Gandy _____

By letter 10/28/66 (attached), Mr. Lester P. Condon, Inspector General, Department of Agriculture, requested that a telephone security survey be conducted by Bureau representatives of the official telephone lines in the office of Secretary of Agriculture Orville Freeman, Room 200A, and the office of Mr. Condon, Room 403E, both in the Agriculture Building. Mr. Condon pointed out that although there were no suspicions that any unauthorized monitoring was taking place, it was felt that a security survey was necessary in view of the important telephone conversations between these offices, the White House, and other officials of the Executive Branch of the Government.

We previously made a telephone security survey of this type for the Department of Agriculture with the Director's approval in 1963. Mr. Condon, who is the chief point of liaison contact with the Department of Agriculture, has continued to be most cooperative in every respect since that time. Both Secretary of Agriculture Freeman and Mr. Condon have expressed their admiration for the Director and respect for the Bureau. It is felt, therefore, we should accede to the current request for a telephone security survey. The Laboratory Division, which has been alerted and which can conduct the survey, can make appropriate arrangements through direct contact with Mr. Condon.

ACTION:

If you approve, Laboratory Division will make the requested telephone security survey for the Department of Agriculture.

Reference is made to the 11/2/66 memorandum from Mr. D. J. Brennan, Jr., to Assistant Director W. C. Sullivan setting forth the request by Lester P. Condon, Inspector General of the Agriculture Department for a security survey of the office telephones of Secretary Orville Freeman and Mr. Condon. The Director approved. Immediately upon approval, the Liaison Section determined from Mr. Condon that the survey should be conducted beginning 11/21/66.

On 11/21 and 22/66, in keeping with arrangements made with Theodore Hauser, Deputy Inspector General for Analysis and Evaluation (former Special Agent), SAs William D. Campbell, W. G. Stevens and [redacted] checked the office telephone facilities of the above individuals within the Agriculture Building and at two telephone company equipment rooms involved.

The check included 13 lines and 4 telephone instruments. No evidence of tampering was observed.

RECOMMENDATION:

That the Liaison Section advise Mr. Condon, Agriculture Inspector General, of the results of the check of his and Secretary Freeman's office telephones.

Reference is made to Mr. Callahan's 2/9/67 memorandum to Mr. Mohr in which it was stated that arrangements had been made, at the request of [redacted] of the House Appropriations Committee, for Laboratory personnel to conduct a security survey for concealed listening devices in the hearing rooms used by the FBI, Defense Department and others. The Director approved.

On February 10 and 13, 1967, SAs [redacted] J. B. Parsons, [redacted] and [redacted] of the Radio Engineering Section conducted a check of rooms HB17, HB18, H140, H144, H216, H217 and H310. At the request of [redacted] the check was limited to the most likely places of microphone concealment in order to eliminate the necessity of having to damage building surfaces. The check included 26 telephone lines and 14 instruments to determine whether the telephones had been altered to permit their use as microphones to pick up room conversation. No evidence of concealed listening devices was found.

[redacted] was present at the conclusion of the security survey, and at his request was advised of the above results. He was also advised that H-135 (originally scheduled) had not been done, inasmuch as it was occupied by [redacted] of the Chairman of the House Appropriations Committee. [redacted] stated it was not necessary to do H-135 at this time and that he would contact Mr. Callahan at a later date regarding this room.

ACTION:

None. For information.

This morning the writer visited [redacted] at the House Appropriations Committee per his request and he indicated that the Chairman would appreciate it if the Bureau could again assist the Committee by having our technicians conduct a security check of the eight hearing rooms which will be utilized for Defense, FBI and other sensitive hearings.

b6
b7C

Accordingly, arrangements have been made for Laboratory personnel to handle five of the rooms tomorrow, February 10th and the remaining three on Monday, February 13th. Room H-310 where our hearings are held will be handled tomorrow as the Justice Hearings will commence at 10:30 A.M. on Monday, February 13th.

The above is submitted for information and you will be informed of the results of the survey and I will inform [redacted] when such survey has been completed and the results thereof.

On 2/2/67, John W. Phillips, Director, Office of Investigations and Security, stated Acting Secretary Trowbridge requested that he determine if it would be possible for the Bureau to make a telephone security check at his residence, [REDACTED]

On 2/2/67, John T. Connor was succeeded by Alexander B. Trowbridge, who will serve as Acting Secretary.

Mr. Phillips advised that a direct line to the White House has been installed at the Trowbridge residence, and the former residence telephone, listed as [REDACTED] has been changed to [REDACTED] (an unlisted number), with two extensions. Access to the Trowbridge residence may be arranged through the office of Secretary Trowbridge by contacting [REDACTED] Extension 3901.

This matter has been discussed with the Radio Engineering Section of the Laboratory.

ACTION:

If approved, the Radio Engineering Section of the Laboratory will comply with the request made by Acting Secretary Trowbridge.

SUBJECT: ALEXANDER B. TROWBRIDGE
ACTING SECRETARY OF COMMERCE
REQUEST FOR TELEPHONE SECURITY CHECKS

D. J. Brennan

Reference is made to the 2/6/67 memorandum to Mr. W. C. Sullivan from Mr. D. J. Brennan setting forth a request for a security check of the residence telephones of Acting Secretary of Commerce Alexander B. Trowbridge. The Director approved.

On 2/16/67, in keeping with arrangements made by the Liaison Section, personnel of the Radio Engineering Section of the Laboratory conducted a survey of the unlisted (EM 2-8523) and the White House Security Board (395-2000, Branch 519) telephones serving the Trowbridge residence at [REDACTED]. The survey included five instruments and the two lines. Inspection was made at all points of access to these lines at (1) the residence, (2) the telephone company equipment offices, and (3) all points outside of the above locations.

No evidence of tampering was observed.

RECOMMENDATION:

That Liaison Section advise Acting Secretary Trowbridge of the results of the above survey.

Memorandum D. J. Brennan to W. C. Sullivan dated June 14, 1966, entitled "Review of Security Procedures Suggested in Admiral Raborn's Letter to the Director Dated June 3, 1966," approved by the Director, established a Security Committee chaired by Assistant Director Sullivan and made up of Assistant Directors Gale, Felt, Tavel, and Casper. The purpose of this Committee was to examine the Bureau's personnel and physical security practices.

A number of lengthy and detailed discussions were held by the Committee and much research has been done. Three basic areas of interest were examined. They were physical, technical, and personnel security. The pros and cons of each point discussed have been reported, and a summary of the discussions is presented in the detailed report attached hereto. Representatives of the Administrative Division and Laboratory Division were invited to appear before the Committee, and they provided their expertise in the areas of personnel supervision and the threat from possibly implanting listening devices in FBI space.

The Committee concluded that although we can consider over-all Bureau security to be relatively adequate, it was incumbent upon the Committee to conduct a thorough self-examination to improve this security. Those areas where the Committee felt FBI security could be improved are discussed below under "CONCLUSIONS AND RECOMMENDATIONS."

ACTION:

Enclosed for the Director's consideration are:

- (1) Conclusions and recommendations of the Committee.
- (2) The detailed report of the Committee.

ORIGINAL FILED IN

Memorandum from Mr. Sullivan to Mr. DeLoach
RE: FBI SECURITY COMMITTEE

CONCLUSIONS AND RECOMMENDATIONS

I. CONCLUSION:

There is a need for personnel in the Domestic Intelligence Division to be made more aware of the meaning and significance of communications intelligence. (Communications intelligence is the interception of communications of other countries, by wire or radio, by a third party for whom the communications were not intended.)

RECOMMENDATIONS:

(1) The Domestic Intelligence Division should proceed with taking the necessary steps to insure that all personnel of the Domestic Intelligence Division have a briefing as to the meaning and significance of communications intelligence and the security provisions for handling communications intelligence as set out by the United States Intelligence Board.

W.S.
CR

(2) On the occasion of Agent and clerical personnel being transferred out of the Domestic Intelligence Division, an appropriate security debriefing will be afforded them regarding communications intelligence.

W.S.
CR
ds

II. CONCLUSION:

Because of the large number of people (clerical personnel) who do process mail, Committee

Memorandum from Mr. Sullivan to Mr. DeLoach
RE: FBI SECURITY COMMITTEE

discussion focused on trying to reduce the number of people who would have access to the identities of Bureau informants and sensitive security information by creating a self-contained file room for the Domestic Intelligence Division. Since the floors of the space presently occupied by that Division will not support the number of file cabinets necessary and because of the many technical problems, such as added cost and space, and the fact that a special file room for retention of sensitive material already exists in the Files and Communications Division, the Committee felt this problem required an in depth study.

RECOMMENDATION:

A separate study be made to determine the feasibility and desirability of reserving space in the Bureau's new building for a separate self-contained Domestic Intelligence Division File Room.

yes.
[Signature]

[Signature]
ds

III. CONCLUSION:

There may be a need for more secure filing cabinets with combination locks for the storing of sensitive ticklers. Because of economy considerations and problems associated with efficient location of files during night hours and week ends, it was felt a survey should be made to establish minimal needs for such filing cabinets.

RECOMMENDATION:

That an immediate survey be made to determine what the Bureau's minimal needs are for combination-lock file cabinets meeting maximum security standards, and if any additional cabinets

[Signature]
[Signature]

Memorandum from Mr. Sullivan to Mr. DeLoach
RE: FBI SECURITY COMMITTEE

of this type are found to be absolutely essential
for sensitive ticklers, they be procured.

Yes.
Handled
see memo
3/3/67
gfb
LS

IV. CONCLUSION:

The need for all Field Offices and Resident Agencies to be re-examined through the normal inspection procedures to determine any vulnerability from clandestine entry as well as overheard conversations due to thin walls, nearby heating registers, et cetera.

RECOMMENDATIONS:

(1) An SAC Letter be prepared instructing SACs to resurvey their Offices and Resident Agencies to determine if their space is vulnerable to overheard conversations due to thin walls, airducts, et cetera.

Yes.
Handled
M. Felt

(2) That the same SAC Letter instruct SACs to survey their Resident Agencies and identify those Resident Agencies where security information is discussed. Those Resident Agencies wherein sensitive security information is discussed and which are identified in the SACs' recommendations will be checked by Bureau-trained soundmen on an irregular basis and no less frequently than once a year for listening devices.

Yes.
Handled

Memorandum from Mr. Sullivan to Mr. DeLoach
RE: FBI SECURITY COMMITTEE

(3) The Inspection Staff will continue to examine the security of Bureau space and will pay particular attention to the adequacy of the survey to be conducted by the SACs. In addition, the Inspection Staff will examine the adequacy of any remedial action suggested by SACs.

V. CONCLUSION:

There is a need for expanding the checks of home telephone lines of Bureau officials to include key personnel of the Domestic Intelligence Division and the New York and Washington Field Offices.

RECOMMENDATION:

The telephone checks on home telephones of members of the Executives Conference be expanded to include the two Inspectors and all Section Chiefs of the Domestic Intelligence Division as well as the senior security supervisors in our Washington Field Office. (The home telephones of our SAC and ASAC in Washington Field Office and of our SACs in the New York Office are already being checked.)

VI. CONCLUSION:

An encrypted telephone line between our New York Office and Seat of Government where the Bureau's most sensitive security cases are discussed is highly desirable but expensive.

Memorandum from Mr. Sullivan to Mr. DeLoach
RE: FBI SECURITY COMMITTEE

RECOMMENDATION:

In view of economy considerations, the Committee felt a positive recommendation for an encrypted line between our New York Office and Seat of Government should be deferred at this time.

yes
JS

VII. CONCLUSION:

The trial use of a new teletype system administered by the General Services Administration has begun. This system provides automatic coding and decoding. If found acceptable after the trial period, this system will be installed at the Seat of Government and throughout the field and should improve the Bureau's communications security. Bureau personnel should be encouraged to use this system for highly sensitive data wherever possible in lieu of the telephone.

205-1 51
Tucker set

RECOMMENDATION:

That an SAC Letter be prepared reminding Bureau personnel that coded teletypes should be used whenever possible for highly sensitive data rather than discussing such matters on the telephone.

yes
JS

VIII. CONCLUSION:

There is a need to expand our security indoctrination programs to provide a continuing alert to all FBI employees as to the threat a hostile intelligence service or sophisticated criminal element represents.

yes
JS

Memorandum from Mr. Sullivan to Mr. DeLoach
RE: FBI SECURITY COMMITTEE

RECOMMENDATIONS:

(1) The preparation of a pilot program which can be used over and over again for security indoctrination at the Seat of Government utilizing the EDEX System (a mechanical teaching system already in the possession of the Bureau) be instituted.

(2) That a new series of well-illustrated posters be placed in prominent places (excluded from the general public's view) which catch the employees' eyes and which deliver security messages.

(3) That the attached security indoctrination outline restating rules and regulations having a security application be used in conjunction with semiannual clerical conferences and Agents' annual conferences.

IX. CONCLUSION:

Due to the general deterioration of moral standards, there is a need for strengthening our supervision of clerical employees to insure early detection of character weaknesses and behavioral

Memorandum from Mr. Sullivan to Mr. DeLoach
RE: FBI SECURITY COMMITTEE

deterioration. Agent and clerical supervisors should be provided, if possible, with a list of specific activities or characteristics of subordinate personnel which they could reasonably be expected to detect and which might alert them to the possibility that an employee was becoming a security risk. The Domestic Intelligence Division should undertake to compile such a list based on a study to be made of cases involving employees of other agencies who have improperly disclosed classified information.

RECOMMENDATIONS:

(1) That the Domestic Intelligence Division attempt to compile a list of those specific activities or characteristics which a supervisor could reasonably be expected to detect and which might indicate an employee was becoming a security risk.

Yes.
[Signature]

(2) That such list be brought to the attention of all supervisory personnel and included in existing supervisory training programs.

Yes.
[Signature]

(3) Assistant Directors and Special Agents in Charge have the specific responsibility to follow up with their personnel to be sure subordinates are using this list..

Yes.

SUBJECT: HONORABLE ALAN S. BOYD, SECRETARY,
U. S. DEPARTMENT OF TRANSPORTATION
REQUEST FOR TELEPHONE SECURITY CHECKS

On 3/2/67, Richard F. Lally, Acting Director of Security, Department of Transportation, stated the Secretary has requested that a determination be made if it would be possible for the Bureau to make a telephone security check of his residence and office.

The Secretary resides at [redacted] The White House line [redacted] has been installed. Listed telephone [redacted] with one extension, will continue to be used by the Secretary.

b6
b7C

The Secretary's office is located in [redacted] 800 Independence Avenue, S. W., Washington, D. C. White House line [redacted] has been installed and his telephone is listed as Government Code 13, Extension [redacted] with five extensions and three intercom attachments.

Access to the Secretary's office and residence may be arranged through the office of the Secretary by contacting Lieutenant Commander James Irwin, Code 13, Extension 25219.

This matter has been discussed with the Radio Engineering Section of the Laboratory.

ACTION:

If approved, the Radio Engineering Section of the Laboratory will comply with the request made by Secretary Boyd.

Reference is made to Mr. D. J. Brennan's 3/3/67 memorandum to Mr. W. C. Sullivan setting forth a request for a security survey of the office and residence telephone lines of Secretary Boyd. The Director approved.

On 3/13/67 and 3/15/67, in keeping with arrangements made by the Liaison Section through Department of Transportation Acting Director of Security, Richard F. Lally, Laboratory personnel of the Radio Engineering Section made a check of the telephone facilities at Secretary Boyd's residence at apartment [redacted] and his office at [redacted] 800 Independence Avenue, S. W., Washington, D. C. The survey involved four instruments and seven lines. All terminal appearances of these lines were inspected at (1) the residence or office, (2) the telephone company equipment buildings, and (3) points of access outside the above locations.

No evidence of tampering was observed.

RECOMMENDATION:

That the Liaison Section advise Secretary Boyd of the results of the above check.

R. F. Lally - Acting Director of Security
Department of Transportation

Dear [Redacted]

Thank you for the suggestion regarding a method for improving telephone security. I thought you might be interested to know that consideration has been given to similar approaches to this problem and they have not resulted in any additional safety but have presented operational problems which would outweigh any anticipated benefits.

The interest which prompted you to submit your idea to me is indeed appreciated.

Sincerely yours,

J. Edgar Hoover

its removal. Suggester advised telephone company will, upon request, place rubber covers over lugs in telephone terminal boxes to indicate special lines. These rubber covers are used on any line the telephone company does not want telephone company employees using for test purposes. Due to sophisticated electronic equipment commercially available today, it is very difficult to guarantee the security of a telephone line. Telephone terminal boxes are readily accessible to public and, at present, there is no security for these terminal boxes as telephone company requires ready access for its employees. It is not practical for telephone company to secure these terminal boxes.

The Laboratory Division notes that telephone company requirements do not permit attaching anything to telephone equipment except attachments which it has approved. The breakable cover as proposed would be removed by any telephone company employee seeing it. The fact that the cover would be broken would not necessarily indicate malicious tampering. One type of cover would not fit all terminals on telephones and would be of no value on new type telephone line construction which is built with a minimum of terminals under what is called "a dedicated plant" concept. Due to these views, Training Division recommends idea not be adopted.

Division of Assignment
Oklahoma City

SUGGESTION

The sophisticated electronic equipment commercially available today makes it very difficult to guarantee the security of a telephone line. The present use of radio transmitter induction coils which can be installed and removed in seconds provides a means to easily tap a particular phone. The induction coil can be removed shortly before a security check is made and no evidence of any monitoring would be noted. Telephone terminal boxes are readily accessible to the public. At present there is no security for these terminal boxes and as the telephone company requires ready access for telephone employees, it is not practicable for the telephone company to secure these terminal boxes.

Continued on next page.

Current practice or rule (Include manual citation as well as facts)

Not applicable.

EXP. PROC.
39 MAY 15 1967

Advantages of suggestion and annual savings (Include basis for estimate)

The use of the breakable covers, as set out above, would enable one making annual security check of a telephone line to determine if the working and multiple appearance (in the terminal boxes) of the telephone line has been tampered with since the last inspection.

As indicated above, telephone company employees do not use the lugs with rubber covers as this is a flag of a special line.

Security of Telephone Service

Disadvantages of suggestion

None known.

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only within two years after submission.)

Re: Suggestion of

b6
b7C

The telephone company, upon request, will place rubber covers over the lugs in telephone terminal boxes to indicate special lines. These rubber covers are used on any line the telephone company does not want telephone company employees using for test purposes.

It is suggested the FBI Laboratory develop a cover for these telephone terminal lugs that could not be removed without breaking. It is felt by the writer some substance could be devised which, when kept moist, would be pliable enough to place over the lug, but when dried would become so brittle it could not be removed without breaking.

This same substance could be used to cover the bottom screws of a telephone instrument so that the cover of the instrument could not be removed without leaving evidence of its removal.

See SAC Letter 67-15 (A).

#972-69

Date

5/31/67

To:

Director, FBI

From: (Suggestor's name)

RICHARD W. SUTER

Division of Assignment

HOUSTON

SUGGESTION

As the Bureau is aware, the most effective and economical counter-measure against surreptitious eavesdropping of conversations, radio transmissions and telephone conversations is a commercial radio broadcast blended into voices emanating from a room.

It is, therefore, suggested the Bureau give serious consideration to the purchase of a sufficient number of small, inexpensive table model commercial broadcast band radios in order that one may be placed in each Resident Agency.

Current practice or rule (Include manual citation as well as facts)

None - no effective counter-measure to guard against accidental or purposeful eavesdropping through entrance doors to Resident Agencies

Advantages of suggestion and annual savings (include basis for estimate)

Advantages: An effective and virtually foolproof method of securing voices emanating from Resident Agency rooms.

To effectively soundproof each entry door to Bureau space would take considerable effort and time, and would undoubtedly cost in the neighborhood of \$50 each, considering cost of soundproofing materials, mastic, weatherstripping, labor, etc. The fact it must be opened defeats any effective method of soundproofing.

Disadvantages of suggestion

None. Initial cost would probably be approximately \$15 each for a good "wired" chassis commercial radio. Maintenance can be handled by the Radio Maintenance Technician assigned to each Division. Bureau can maintain parts.

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

PLAYING

The above suggests that the Bureau purchase and play an inexpensive radio in each Resident Agency as a countermeasure against surreptitious eavesdropping.

As the suggestion states, the Bureau is aware of the technical effect from playing a radio in a room for the stated purpose. However, to be sure to be effective, the radio should be played at a level equal to or above the voice levels which makes conversation difficult, which would rebroadcast the radio program on the Bureau radio calls and might be objectionable in some Resident Agencies, such as courthouses, etc.

In general, it is felt that playing radio programs could easily lead to unjust criticism that Bureau Resident Agents sit around and listen to the radio during working hours.

Although it may be highly desirable to use radio music in a plant or lookout to improve over-all security, as well as a countermeasure against eavesdropping, it is not felt that it would be appropriate for general use as suggested by SA Suter.

It is noted that the cost for such radios for 524 Resident Agencies would probably be at least \$7,860. Maintenance of these radios could be handled by office personnel except where it would be more economical for Resident Agencies to handle repairs locally.

RECOMMENDATION:

It is recommended that the above unfavorable comments on the suggestion be forwarded for the information of the Training Division.

DATE: July 5, 1967

FROM : A. J. Baker

SUBJECT: SECURITY SURVEY, RESIDENCE
TELEPHONES OF PAUL H. NITZE,
DEPUTY SECRETARY OF DEFENSE

Security of Telephone Services

In my 6/23/67 memorandum to you concerning the above subject (which the Director approved), I indicated there were Washington, D. C., and a Bel Alton, Maryland, residence involved.

On 6/26/67 and 7/3/67 Radio Engineering Section personnel completed the check of the telephone facilities at [redacted]

This included the examination of five instruments, two normal commercial lines, one White House Security Board line, and two Command Post lines. All terminal appearances of these lines were examined at the residence, the telephone exchange buildings, and at all points outside these locations.

No evidence of tampering was observed.

Colonel Abbott Greenleaf, Military Assistant to the Secretary of Defense, advised that the underground cable for the Security Board and Command Post lines has not yet been installed at the Bel Alton, Maryland, residence and requested that that portion of the check be deferred until the telephone company completes the installation sometime after July 15, 1967. Colonel Greenleaf will advise SA [redacted] or SA Wilbur G. Stevens when the Bel Alton installation is completed.

RECOMMENDATION:

That Liaison Section advise Mr. William C. Hunt (Director, Security Division, Office of Secretary of Defense), of (1) the results of the completion of the check at [redacted] and (2) the fact that the Bel Alton, Maryland, check will not be completed until the telephone company finishes underground cable installation there, sometime after July 15, 1967.

Reurairtel 6/29/67 covering transmittal of one 500 D and one 565 special Western Electric (WE) telephone sets to the Bureau.

These sets are the ones specified by the State Department Division of Technical Services (DTS) in 1964 as being the proper ones for your office. Apparently due to changes that have occurred since then, the State Technical Security Officer has now advised that you need a WE 510 (one or two lines) and a WE 444Ec-3 (four lines) set. The 510 can be obtained. However, WE not only has not made the 444 set for several years, but State's DTS now recommends against the use of multibutton sets. Instead, the combination of a 510 set and a multibutton key pad is recommended because it is easier to protect and simpler to check for possible compromise from a technical standpoint. State's DTS also advises that WE has encountered difficulty in making the new 1A2 system serve as many functions as the older 1A1 system, and may have to reinstitute production of the 1A1 system for State.

These matters will be taken up directly by the Bureau with State's DTS. You will be advised when a determination is made of the exact telephone equipment to be furnished your office.

telephone services

A representative of State Security finally arrived in Ottawa and endeavored to install the two special telephone instruments referred to in rebuairtel. He has advised me that they are not compatible with existing lines in Ottawa Office and following would be required:

"Telephone System - 1A1 Key;
not 1A2 Key System."

"1 - instrument W.E. 510 type - pick up two lines
and push button for buzzer."

"1 - instrument W.E. 444EC-3
4 button set;
pick up 3 lines and hold button."

The instruments are being returned to the Bureau under separate cover and new instruments along above specifications should be made available.

For further information of Bureau, space occupied by the Legat was swept by the State Department technician on 6/28/67 and telephones were checked at the same time as was the ultra-sonic burglar alarm.

By letter to the Director dated August 16, 1967, Mr. William C. Hunt, Director of the Security Division, Office of the Secretary of Defense, requested that a security survey be made of the Office of the Secretary of the Navy, Room 4E686, the Pentagon.

Hunt is a cooperative contact of the Bureau's Liaison Section, and at his special request, on a limited number of occasions in the past the Bureau has performed security surveys for the Secretary of Defense and top-ranking Defense officials. It was learned that this particular request was made by Captain Worth H. Bagley, Executive Assistant and Naval Aide to the Secretary of the Navy, with the concurrence of Mr. Solis Horwitz, Assistant Secretary of Defense (Administration).

It is noted that the Office of the Secretary of the Navy is currently unoccupied as Secretary of the Navy designee, Paul R. Ignatius, now Assistant Secretary of Defense, has not yet assumed these duties. The recently appointed Secretary of the Navy, John T. McNaughton, was killed in an airplane crash on July 19, 1967.

This matter has been coordinated with the Radio Engineering Section of the Laboratory.

ACTION:

If approved, Laboratory personnel will conduct a security check of the Office of the Secretary of the Navy.

By letter to the Director dated 6/21/67, Mr. William C. Hunt (Director, Security Division, Office of Secretary of Defense, and a cooperative Liaison Section contact) inquired whether the Bureau would conduct a security survey of the telephone facilities in the office of the Secretary of Navy in the Pentagon. The recommendation in Mr. D. J. Brennan's 8/21/67 memorandum to Assistant Director W. C. Sullivan that the Laboratory make the above survey was approved by the Director.

On 8/23-24/67, Radio Engineering Section personnel completed a security check of the telephone facilities in the Office of the Secretary of Navy in room 4E686 of the Pentagon. This involved four telephone instruments and three regular Pentagon lines, one White House line, one normal commercial line, and eight lines for intercommunication with staff members. All terminal appearances of these lines were examined in the Secretary's office, elsewhere in the Pentagon, and at three other telephone exchange buildings. No evidence of tampering was observed.

No one in the Secretary's or Mr. Hunt's office has been advised of the results of this check.

RECOMMENDATION:

That the Liaison Section advise Mr. William C. Hunt (Director, Security Division, Office of the Secretary of Defense) and Captain Worth H. Bagley (Executive Assistant and Naval Aide to the Secretary of Navy) of the results of the above security survey.

[redacted] this afternoon stated that the Chairman had asked him to see if the Director would be agreeable to make personnel available to conduct a security survey similar to the ones we have done in the past of certain committee rooms and the Chairman Mahon's office prior to the commencement of hearings. In the past the Director has approved when personnel in the Laboratory were available for them to proceed to the appropriations committee and run security surveys to see if there were any hidden devices such as in the full committee room, the Chairman's suite and the Defense hearing room and two other rooms used for confidential and classified conferences.

[redacted] stated there are eight rooms involved; some large and some small identified as follows: [redacted] These same areas were surveyed approximately one year ago with the Director's approval at the request of Chairman Mahon.

If approval is granted [redacted] indicated he would prefer, if possible, to have Rooms 216, 217 and 218 done as early as possible Monday morning, February 5th i.e. about 8:00 A.M. and the rest of the rooms thereafter.

The Laboratory has advised that qualified personnel can be made available for this survey as in the past should the Director approve.

RECOMMENDATION

It is recommended that approval be granted for the requested security survey of the area as set forth above.

By 2/1/68 memorandum to Mr. Mohr, Mr. Callahan reported that [redacted] Clerk and Staff Director of the House Appropriations Committee, had requested that FBI Laboratory personnel make a security survey for concealed listening devices in several staff offices and hearing rooms used by the FBI, Defense Department and other agencies. The Director approved.

b6
b7C

On 2/3/68 and 2/5/68, Special Agent's William D. Campbell, J. B. Parsons, [redacted] and [redacted] of the Radio Engineering Section conducted a check of Rooms 17, 18, 135, 140, 142, 143, 144, 216, 217, 218 and 304. At [redacted] request, the check was limited to the most likely places of microphone concealment in order to eliminate the necessity of having to damage building surfaces. The survey included forty-nine telephone lines and thirty-three instruments to determine whether the telephones were being used to pick up room conversation when not in normal use. No evidence of concealed listening devices was found.

Mr. Callahan has been advised of the results of the survey so that he could inform [redacted] who was not present when the survey was concluded.

ACTION:

None. For information.

By 2-12-68 memorandum to Mr. Mohr, Mr. Callahan reported a request from [redacted] of the House Appropriations Committee, that a security survey be made of Hearing Room 310 prior to the Director's budget testimony on 2-23-68. The Director approved.

b6
b7C

SA's [redacted] conducted the above survey on 2-19-68, pursuant to arrangements made by Mr. Callahan. At the request of [redacted] the check was limited to the most likely places of concealment of microphones in order to eliminate the necessity of having to damage building surfaces. Three telephone instruments and four lines were checked within the confines of Room 310 to determine whether the telephones were being used to pick up room conversation when not in normal use. No evidence of concealed listening devices was found.

[redacted] was not present at the conclusion of the survey. The results were promptly made known to Mr. Callahan, who in turn advised [redacted].

[] this afternoon stated the Chairman would appreciate it if the Director could arrange again this year to have a security survey made of the Subcommittee Hearing Room in which the Director appears prior to the time the Director is scheduled for hearings, i. e. Friday, February 23rd at 10:30 A. M. [] pointed out the most convenient time would be, if possible, Monday morning, February 19th shortly after 9:00 A. M. [] stated that they would be having hearings in the room the rest of the week and it would not be as readily available thereafter.

The Laboratory Division has advised that personnel can be made available to perform this check of the hearing room should the Director approve.

RECOMMENDATION

That the Director approve making the security survey requested on Monday, February 19th.

On 3-11-68 Radio Engineering Section personnel completed a security check of the outside terminal appearances of the residence telephone lines of Senator McClellan, in accordance with a previously approved program of periodic checks for the Senator. The check at this time included only the inspection of points of access in the telephone frame room in the basement of the Senator's apartment building (the only appearance outside the Senator's residence and the telephone exchange buildings). His office telephone system has no outside appearances and was not checked at this time.

No evidence of tampering was observed.

RECOMMENDATION:

That Senator McClellan be advised of the results of his residence telephone check.

Assistant Attorney General J. Walter Yeagley called me this afternoon to inquire whether we were still making security checks of the Attorney General's lines as we have done on past occasions. I told him that I would check and let him know.

Although we have in past years included the Attorney General's lines in our regular periodic check of Executives Conference members' telephone lines, such check of the Attorney General's lines was discontinued in 1964. On memorandum from [redacted] to Mr. Belmont dated 8/28/64, concerning a request of the Attorney General for such a check, the Director commented, "Disregard. My reason for this is that Mrs. Kennedy has publicly charged that the phones are tapped by the FBI at direction of President Johnson. For this reason we are not checking any phones. They can get Tel. Co. to do it." Subsequently, at the specific instructions of the Director in July 1966, a security check was conducted of Attorney General Katzenbach's office space for microphones as well as telephone security. No further checks have been made.

It is suggested that I advise Yeagley that we have received no request to check Attorney General Clark's lines and, therefore, no such checks have been made.

ACTION:

If approved, I will so advise Mr. Yeagley.

FROM : J. Walter Yeagley, Assistant Attorney General, Internal Security Division

SUBJECT: SECURITY CHECK OF THE ATTORNEY GENERAL'S TELEPHONE LINES

It would be appreciated if Bureau technicians could check all the telephone lines in the Attorney General's office for security. If you are able to do this, the necessary arrangements can be made through [redacted]

[redacted] also receives a number of important business calls at home, particularly on weekends, and it would probably be advisable to also check his home phone and the White House extension in his home. If you are able to do so, I would suggest you make arrangements for this directly with [redacted] or if you prefer, I would be glad to make whatever arrangements are desired.

I have discussed the foregoing with the Attorney General and he thinks it is important that these checks be done.

DATE: 3/6/68

FROM : MR. I. W. CONRAD

SUBJECT: SECURITY CHECK OF THE
ATTORNEY GENERAL'S TELEPHONE LINES

As set forth in my memorandum of 3/1/68, (attached) the Bureau has received no previous request to check Attorney General Clark's telephone lines, and, therefore, no such checks have been made. Pursuant to the Director's instructions, Assistant Attorney General J. Walter Yeagley was so advised in response to his request.

C-187X 2301

The Bureau is now in receipt of a letter from Yeagley dated 3/5/68, (also attached) requesting the FBI to conduct a check of all of the telephone lines in the Attorney General's office and residence for security. It is suggested that the Director may wish to comply with this request.

ACTION:

Accordingly, unless advised to the contrary, we will arrange to make the telephone line security check as requested.

**SECURITY SURVEY
OFFICE AND RESIDENCE TELEPHONES**

Mr. Campbell

At the request of Assistant Attorney General J. Walter Yeagley, personnel of the Federal Bureau of Investigation recently conducted a security survey of your office and residence telephones. This survey, which involved a check of twelve lines and six instruments in your office suite and two lines and three instruments at your residence, has been completed. Included was an inspection at all points where access could be had to the above lines (1) in your office and residence, (2) in telephone exchange buildings, and (3) outside the above locations.

No evidence of tampering was found.

Memorandum

TO : Mr. Conrad

DATE: 3/21/68.

FROM : R. W. Swartz

SUBJECT: SECURITY CHECK OF THE
ATTORNEY GENERAL'S TELEPHONE LINES

Telephone Security Checks

Reference is made to Mr. Conrad's 3/6/68 memorandum to Mr. Mohr.

In it he reported receipt of an interdepartmental memorandum to the Director from Assistant Attorney General J. Walter Yeagley dated 3/5/68, in which the latter reported a request by the Attorney General for a security check of his (the AG's) office and residence telephone lines. The Director approved.

Radio Engineering Section personnel of the Laboratory, in accordance with appointments made by Mr. Yeagley, have completed a security survey of the office telephone facilities (seven Justice Department extensions, three private unlisted lines, one White House switchboard extension, one Army Security Board extension, and six telephone instruments), and the residence facilities at Falls Church, Virginia, (one private unlisted line, one Army Security Board extension, and three instruments). This included an inspection at all points where access could be had to the lines (1) in the office and residence, (2) in the telephone exchange buildings, and (3) outside the above locations. Also included was a check of the telephone instruments to determine if they were being used as a microphone to pick up room conversation when they were not in normal use.

No evidence of tampering was found.

RECOMMENDATION:

That Mr. Yeagley be advised of the results of the security check made of the Attorney General's Office and residence telephone.

TO : Mr. W. C. Sullivan

DATE: 6/12/68

FROM : D. J. Brennan, Jr.

SUBJECT: TELEPHONE SECURITY SURVEY OF THE
OFFICE OF THE SECRETARY OF AGRICULTURE,
ORVILLE FREEMAN, AND RESIDENCE OF THE
UNDERSECRETARY OF AGRICULTURE, JOHN A. SCHNITTKE

By letter 6/10/68 (attached), the Office of the Inspector General, Department of Agriculture, requested that a telephone security survey be conducted by Bureau representatives of the official telephone lines in the Office of the Secretary of Agriculture Orville Freeman, Room 200A, Agriculture Building, and the residence of Undersecretary of Agriculture John A. Schnittke, [redacted]

It was pointed out that although there were no suspicions that any unauthorized monitoring was taking place, it was felt that a security survey was necessary in view of the important telephone conversations between the Executive Branch of the Government, the White House, and the Secretary's Office, and the many official telephone calls received by Undersecretary Schnittke at his residence.

We previously made a telephone security survey for the Department of Agriculture with the Director's approval in 11/66. The Inspector General's Office, the chief point of liaison contact with the Department of Agriculture, continues to be most cooperative in every respect since that time. Secretary of Agriculture Freeman has expressed his admiration for the Director and respect for the Bureau. It is felt, therefore, we should accede to the current request for a telephone security survey. The Laboratory Division, which has been alerted, can make appropriate arrangements through direct contact with Mr. Louis J. Roth, Acting Inspector General.

ACTION: If you approve, Laboratory Division will make the requested telephone security survey for the Department of Agriculture.

SECURITY OF TELEPHONE FACILITIES,
JUSTICE BUILDING

Recently, and again on June 19, 1968, the Department's telephone frame room, room 2412 of the Justice Building, was found to be unlocked and unattended. These instances were informally called to the attention of your office.

Since the Justice Building is open to the public during regular office hours, and because not only the Department's entire telephone system cables and terminals but the FBI's trunk cables and dial-intercom equipment are located in this frame room, we strongly feel it should be locked at all times.

Reference is made to the 6-12-68 memorandum from Mr. D. J. Brennan, Jr., to Mr. W. C. Sullivan setting forth the request by L. J. Roth, Acting Inspector General of the Agriculture Department for a security survey of the office telephones of Secretary Orville Freeman and the residence telephones of Undersecretary John A. Schnittker. The Director approved.

On 6, 17-18-26-28, 68, in keeping with arrangements made with officials of the Agriculture Department, SAs W. D. Campbell, [redacted] and [redacted] checked the office telephone facilities of Secretary Freeman and the residence telephone facilities of Undersecretary Schnittker. The facilities checked included three telephone company equipment rooms and the outside working appearance of the telephone line of Undersecretary Schnittker.

The check included 10 lines and 4 telephone instruments. No evidence of tampering was observed.

RECOMMENDATION:

That the Liaison Section advise Mr. Lester P. Condon, Agriculture Inspector General, of the results of the checks of Secretary Freeman's office telephones and Undersecretary Schnittker's residence telephones.

The Justice Department's telephone switchboard is in room 2416, and the Department's frame (telephone terminals and switches) room is adjacent to the switchboard in room 2412, in Justice Department space. Both rooms open into the Great Hall, which is readily accessible from the courtyard. The Bureau's telephone trunks pass through the Justice frame room, and the dial equipment for the Bureau's 2-digit dial intercom system is in this frame room. There is no available space to relocate our facilities, which were installed there initially years ago, and if there were space to relocate them the cost would be prohibitive, especially in view of the Bureau's contemplated move to our own building in a few years.

On 6/19/68 one of our employees checked the Justice frame room and found it unlocked and unattended. The public has access normally to the Justice Building during regular working hours. Necessity for keeping the Justice frame room locked to eliminate possibility of anyone entering to disrupt Department or Bureau phone facilities has previously, and again on 6/19/68, been called to the Department's attention. We not only keep the Bureau's telephone frame room locked, the corridor doors are covered with heavy sheet metal and cannot be unlocked and entered from the corridor. Entry to the room may be made only through our switchboard where the corridor door is locked at all times.

I feel it would be appropriate now to officially call the matter to the attention of the Justice Department.

RECOMMENDATION:

Attached letter to the Administrative Division of the Department be approved.

My 6/21/68 memorandum to you set forth a request by [redacted] Director of Security of the above department, for a telephone security survey and countermeasure installation for Secretary Cohen. It was approved by the Director.

b6
b7C

On 7/2, 5 & 10/68, in accordance with appointments made by [redacted] Radio Engineering Section personnel completed a telephone security check and installed countermeasure devices on the office telephones of Secretary Cohen. This involved five telephone instruments and eight lines. A check was made at all points of access to the lines in the Secretary's office, in the HEW building and the telephone company exchange buildings. No evidence of tampering was observed.

RECOMMENDATION:

That the Liaison Section advise [redacted] of the results of the security survey.

By letter to the Director dated June 13, 1968, Mr. Frederick H. Schmidt (former SA), Director of Security for Health, Education and Welfare, inquired whether the Bureau would make (1) a security survey of the office telephones of Secretary Cohen and (2) install countermeasure devices (to prevent the instruments from being used as microphones to pickup room conversation). The countermeasure device was developed by the FBI and the installation of these countermeasures on Cabinet Officer telephones has been a continuing integral part of a White House communications security program in which the White House initially requested the installation of these devices on Cabinet Officer phones.

With the Director's approval, the Bureau has previously made both telephone security surveys and countermeasure installations for various Secretaries of the Department of Health, Education and Welfare, dating back to the Eisenhower Administration in 1953. Mr. Schmidt has been most cooperative with the Bureau as its principal liaison contact for personnel information in his agency. Liaison advises also that it was through the personal intervention of the Secretary of Health, Education and Welfare that the Bureau has been able to continue receiving Social Security information which has been denied other investigative agencies.

As a byproduct, the countermeasure installations and related security checks by the FBI have contributed very substantially to the excellent relations enjoyed by the FBI with our high-level telephone company contact through whom the Bureau secures the necessary cooperation from the telephone company in connection with the Bureau's investigative activities in the internal security area.

Accordingly, in view of the above circumstances, it is suggested the Bureau may wish to comply with the current request. Estimated time: 2 men for 1 1/2 days.

RECOMMENDATION:

That Mr. Schmidt be advised that the FBI will perform the requested countermeasures installation and related security check.

By letter to the Director dated July 24, 1968, Mr. John W. Phillips (former SA), Director of Investigations and Security for the Department of Commerce, advised that Secretary Smith was moving to a new residence and had expressed a desire to have the FBI make a security check of his White House and regular (unlisted) telephone lines.

With the Director's approval, the Bureau has previously conducted office and residence telephone security work for various Secretaries of Commerce, dating back to Secretary Sinclair Weeks in 1953. John Phillips, as the Bureau's principal liaison contact at the Commerce Department on investigative and security matters, has afforded the Bureau excellent cooperation. It is also pointed out that these security checks contribute substantially to the excellent relations enjoyed by the Bureau with high-level telephone company contacts who furnish invaluable services to the FBI in connection with internal security investigations.

In view of the above circumstances, Bureau may wish to comply with the current Commerce Department request which will require two men approximately one day.

RECOMMENDATION:

That Mr. Phillips be advised the FBI will perform the requested security check:

SUBJECT: Telephone at home of
Joseph Califano,
Administrative Assistant
to the President

[redacted] Administrative Assistant to
the President, called me at 9 p.m., 8/22/68, and stated
something definitely seemed to be wrong with the telephones
at his home and he would deeply appreciate the FBI making
a check. He stated we had done this once before and our
services in this regard had given him great peace of mind.

He added that the telephone company had recently
advised him that there seemed to be someone interfering with
his phones. He had no information other than this.

In view of Califano's position, and the fact that
he talks constantly with the President, it is recommended
that the Laboratory make this check at a convenient date and
time. I should advise Califano prior to the check being
made as to the specific date and time.

SUBJECT: TELEPHONE AT HOME OF [REDACTED]

b6
b7C

ADMINISTRATIVE ASSISTANT TO THE PRESIDENT

DC.

By 8/23/68 memorandum to Mr. Tolson, Mr. DeLoach reported that [REDACTED] stated he had been told by the telephone company that "there seemed to be someone interfering with his home phones." He said he would appreciate the FBI making a security check. The Director approved.

On 8/27/68, in accordance with arrangements made by Mr. DeLoach, FBI Laboratory personnel conducted a security survey of [REDACTED] residence telephone facilities. These consist of a regular (listed) line, an extension off the White House security switchboard, and four instruments.

Inspection was made at all points of access to [REDACTED] telephone lines at his residence, at telephone company exchange buildings, and outside the above locations. No evidence of tampering was observed.

It was determined from the telephone company that new cables had recently been installed in the [REDACTED] residential area necessitating a switch of his lines from the old to the new cable. Also, on 8/14/68, as a result of its own testing procedures, the company determined that the regular [REDACTED] line was faulty and dispatched a man to make repairs. [REDACTED] advised SA [REDACTED] that after the telephone repairman completed his work, he remarked to her that he "could not understand how the wires on the telephone pole (from which the [REDACTED] lines are run to the house) got so mixed up." The cable change, faulty line and the repairman's remark probably account for [REDACTED] believing something was wrong with his telephones. [REDACTED] advised [REDACTED] there has been no recurrence of trouble since the last repairs.

b6
b7C

RECOMMENDATION:

That [REDACTED] be advised of the result of the above security check.

SUBJECT: SECURITY SURVEY, OFFICE TELEPHONES OF
SECRETARY OF COMMERCE MAURICE STANS,
THE UNDERSECRETARY AND FIVE ASSISTANT SECRETARIES

Security Telephone Services

Mr. John W. Phillips, Director of Investigations and Security at the Department of Commerce, by letter to the Director dated 2/3/69, advised that Secretary Stans had requested that a security check be made of the Secretary's office telephone facilities and those of his Undersecretary and five Assistant Secretaries. Phillips is a former Special Agent and the Bureau's principal liaison contact on investigative and personnel matters at Commerce.

The Bureau has conducted similar security checks for various Secretaries of Commerce dating back to 1953. It is suggested that the Bureau may wish to comply with the present request.

ACTION:

If approved, a security survey will be conducted for the Secretary of Commerce at a time arranged through John W. Phillips.

Mr. John W. Phillips
Director, Investigations and Security
Department of Commerce
Washington, D. C. 20230

Dear Mr. Phillips:

As requested in your letter to me of February 3, 1969, I have had Special Agents of the Federal Bureau of Investigation conduct a security survey of the office telephone systems of Secretary of Commerce Maurice Stans, the Undersecretary, and five Assistant Secretaries. The facilities in their offices, in telephone company exchanges, and at all points of access outside of the above locations were inspected.

No irregularities were detected at the time of the survey.

Sincerely yours,

John Edgar Hoover
Director

NOTE:

Reference is made to your 1/27/69, memorandum to Mr. Mohr advising of a telephonic request by Assistant Attorney General J. Walter Yeagley for a security check of the office and residence telephones of Attorney General John M. Mitchell. The Director approved the check.

In keeping with arrangements made by Mr. Yeagley, a survey of the office telephone facilities was completed by FBI Laboratory personnel on February 3 and 4, 1969. This involved the checking of thirteen telephone instruments and sixteen local and outside lines. No evidence of tampering was observed.

The Attorney General is still occupying an apartment on a temporary basis in the Washington area. Mr. Yeagley advised that he will contact the Bureau further regarding a suitable time for the residence survey after the Mitchells have moved into a permanent residence.

Mr. Yeagley has advised that an oral report of the results of the check will be sufficient.

ACTION:

(1) If approved Mr. Yeagley will be advised telephonically that the results of the office check were negative.

(2) We will complete the approved check at the residence upon receipt of further advice from Mr. Yeagley.

TO : MR. J. P. MOHR
DATE: 1/27/69
FROM : I. W. CONRAD
SUBJECT: REQUEST FOR SECURITY CHECK OF
ATTORNEY GENERAL'S TELEPHONES

Mr. J. Walter Yeagley, Assistant Attorney General, Internal Security Division, Department of Justice, called me to advise that the Attorney General had requested a security check of the phones in his office. Yeagley further indicated that the phone installations had not been fully completed at the Attorney General's residence, but that upon completion a similar security check would be desired of those installations also.

We have conducted similar security checks on occasion in the past, and it is suggested that the Bureau may wish to comply with the present request.

ACTION:

If approved, I will so advise Yeagley and work out a mutually convenient time schedule.

In accordance with a continuing program, previously approved by the Director, Radio Engineering Section personnel have completed a security check of the residence telephone lines of the above-indicated Bureau officials. This check included an examination of all instruments, and of the terminal appearances of the telephone lines at the residence, telephone exchange buildings and all points of access outside the above locations.

No evidence of tampering was observed.

ACTION:

None. For information.

miz Reference is made to my 1/28/69 memorandum to you concerning receipt of a letter from Mr. H. B. Montague, Chief Postal Inspector, setting forth a request by the Postmaster General for a security check of the telephones in his office and those in the offices of his Executive Assistant and the Deputy Postmaster General. The Director approved.

In accordance with arrangements made through Mr. Montague, FBI Laboratory personnel completed the survey on February 5, 1969. This involved the inspection of nine telephone instruments and seventeen local and outside lines. No irregularities were detected.

Since Mr. Montague has advised that he would appreciate a written report on the results, a suggested letter to him is attached. This matter has been coordinated with Liaison Section SA [redacted] who handles Post Office matters.

RECOMMENDATION:

If approved, the Liaison Section will deliver to Mr. Montague the attached letter which sets forth the results of the check for the Postmaster General.

Mr. H. B. Montague
Chief Postal Inspector
Post Office Department
Washington, D. C. 20260

Dear Mr. Montague:

Pursuant to the request in your letter of January 23, 1969, personnel of the Federal Bureau of Investigation completed a security check of the office telephone systems of Postmaster General Winton M. Blount, his Executive Assistant, and Deputy Postmaster General. This included an inspection of the facilities in the offices, in the telephone company exchanges, and at all points of access outside the above locations.

I am glad to report that no evidence of tampering was observed at the time of the check.

Sincerely yours,

John Edgar Hoover
Director

By letter to the Director dated 1/23/69, Mr. H. B. Montague, Personnel Security Officer of the Post Office Department advised that the new Postmaster General had expressed a desire to have a check made of the White House and regular telephone lines in his office and in the offices of his Executive Assistant and Deputy Postmaster General.

With the Director's approval, the Bureau has previously conducted office telephone security work for previous Postmaster Generals, dating back to 1961. H. B. Montague is the Bureau's long-time and trusted liaison contact with the Post Office Department on investigative and security matters, and has afforded the Bureau excellent cooperation. Coincidental with these security checks, an opportunity is afforded the Bureau to maintain its excellent relations with high-level telephone company officials who furnish invaluable services to the FBI in connection with internal security investigations.

In view of the above, it is felt that it would be to the Bureau's advantage in its relationship with established and new Post Office Department officials to conduct the requested security check which will require two men approximately one day.

RECOMMENDATION:

That Mr. Montague be advised the Bureau will perform the requested security check.

By 2/4/69 memorandum to you, I reported receipt of a letter to the Director from John W. Phillips (former SA), Director of Security at the Department of Commerce, dated 2/3/69. The letter advises that Secretary Stans had requested the FBI to make a security check of his office telephones and those of his Undersecretary and five Assistant Secretaries. The Director approved.

Through arrangements made by Mr. Phillips, on 2/11-12, 1969 Special Agents of the Radio Engineering Section of the FBI Laboratory conducted a survey of the telephone facilities of Secretary Stans and the other officials. This involved the inspection of fourteen instruments and thirty-two local and outside lines. No indication of tampering was observed.

Mr. Phillips has advised that he would appreciate a written reply as to the results. A suggested letter to Mr. Phillips is attached. This matter has been coordinated with SA who handles liaison matters with the Department of Commerce.

b6

Security of Telephones

SUBJECT:

SECURITY SURVEY,
OFFICE AND RESIDENCE TELEPHONES OF
SECRETARY OF AGRICULTURE CLIFFORD HARDIN

WASH. D.

By letter to the Director dated 2/3/69, Lester P. Condon, Inspector General of the Department of Agriculture, advised that Secretary Hardin had inquired if it would be possible to have FBI personnel (1) make a security check of his office and residence telephones, and (2) install countermeasure devices in the telephones.

With the Director's approval, we have previously made office and residence telephone security surveys and countermeasure installations on special request for the Secretaries of Agriculture since 1951. (Countermeasures are used to prevent telephones from being used as microphones to pick up room conversation.) The Inspector General's office is the chief point of Bureau liaison contact, and Mr. Condon has been most cooperative. It is suggested that the Bureau may wish to comply with the present request.

ACTION:

If approved, Liaison Section will contact Mr. Condon so that arrangements can be made for FBI Laboratory personnel to do the requested security survey and countermeasure work of the Secretary of Agriculture.

Dear Mr. Roth:

As requested in former Inspector General Lester P. Condon's letter to me of February 3, 1969, I have had Special Agents of the Federal Bureau of Investigation conduct a security survey of the residence and office telephone service of the Secretary of Agriculture, Clifford M. Hardin. The survey was delayed at Mr. Condon's request until all changes in the telephone system at each location were completed by the telephone company.

The facilities at the residence and office, as well as the telephone exchanges and all points of access outside of the above locations, were inspected. Countermeasure devices were installed on the telephone instruments. No irregularities were found at the time of the survey.

Sincerely yours,

John Edgar Hoover
Director

NOTE: SA L. F. Schwartz of the Liaison Section of the Domestic Intelligence Division has advised that as of March 21, 1969, Mr. Condon has assumed new duties at the Department of Housing and Urban Development and Mr. Louis J. Roth, Assistant Inspector General, is handling the duties of the Inspector General at the Department of Agriculture at the present time. Cover memo W. W. Bradley to Mr. Conrad dated 3/26/69. Mr. Callahan by memorandum to Mr. Mohr dated 3/15/69, reported a request by [redacted] House Appropriations Committee, for a security survey to be made of the Committee Hearing Room prior to the Secretary of State's testimony on March 18, 1969. b6
b7C

SA's [redacted] conducted the above survey on March 17, 1969. At the request of [redacted] the check was conducted in Hearing Room 310 and was limited to the most likely places of concealment of microphones in order to eliminate the necessity of having to damage the building surfaces. Three telephone instruments and four telephone lines were checked within the confines of this room to determine whether the telephones were being used to pick up room conversation when not in normal use. A radio frequency search was conducted to determine if any microphones were being used in connection with miniature concealed radio transmitting devices. No evidence of concealed listening devices was found, and [redacted] was so advised at the completion of the survey.

RECOMMENDATION:

By February 5, 1969 memorandum to you, I reported receipt of a letter to the Director from Lester P. Condon, Inspector General of the Department of Agriculture, dated February 3, 1969. The letter advises that Secretary Hardin had requested the FBI to conduct a security survey of the telephone service at his residence and his office and install countermeasure devices in the telephones. The Director approved. This survey was delayed to allow for telephone changes.

Through arrangements made by Mr. Condon, on March 21, 1969, Special Agents of the Radio Engineering Section of the FBI Laboratory completed this security work at the residence and Office of the Secretary of Agriculture, Clifford Hardin. This included eight instruments and fourteen lines. No indication of tampering was observed.

The Office of the Inspector General of the Department of Agriculture has advised that a written reply of the results of this survey would be appreciated. A suggested letter is attached. This has been coordinated with L. F. Schwartz who handles liaison matters with the Department of Agriculture.

RECOMMENDATION:

If approved, the Liaison Section of the Domestic Intelligence Division will deliver the attached letter to the Office of the Inspector General of the Department of Agriculture reporting the results of the telephone security survey made for Secretary Hardin.

RESIDENCE TELEPHONES OF
SECRETARY OF COMMERCE MAURICE H. STANS

By 6/4/69 memorandum to you, I reported receipt of a letter to the Director, dated 6/2/69, from John W. Phillips (former SA), Director of Investigations and Security at the Department of Commerce. The letter advises that Secretary Stans would appreciate having the FBI make a check of the telephone facilities at his new permanent residence in Washington, D. C. The Director approved.

Through arrangements made by Mr. Phillips, on 6/11-13/69, Special Agents of the FBI Laboratory conducted a survey of the telephone facilities at Secretary Stans' residence at [REDACTED]. This involved the inspection of five telephone instruments and three lines. No indication of tampering was observed. b6 b7C

Mr. Phillips has advised that he would appreciate a written reply on the results (which the Director approved in the case of the recent security survey of the office telephones of Secretary Stans). A suggested letter to Mr. Phillips is attached. This matter has been coordinated with SA [REDACTED] who handles liaison matters with the Commerce Department. *RA*

By letter to the Director dated 6/2/69, John W. Phillips, Director of Investigations and Security, Department of Commerce, advised that Secretary Stans would greatly appreciate having the FBI make a security check of the telephone facilities in his new permanent residence in Washington, D.C. Phillips is a former Special Agent and the Bureau's principal liaison contact on investigative and personnel matters at Commerce.

The Bureau has conducted similar checks for various Secretaries of Commerce in the past and recently, with the Director's approval, made a security check of Secretary Stans' office telephone facilities.

ACTION:

If approved, a security survey will be made of the residence telephone facilities of Secretary of Commerce Maurice H. Stans at his new apartment at [REDACTED]

Reference is made to Mr. Branigan's 5/28/69 memorandum to Mr. Sullivan in which it was recommended that, due to the possibility of Soviet interception of telephone communications, the periodic telephone security checks should be expanded to include the home telephones of 14 New York and 9 Washington Field Office Security Supervisors. The Director asked, "Just how much manpower will be involved in this?"

It is estimated that the above-suggested 23 telephone security checks would require approximately 34 man-days to complete the necessary inspections now being made on current checks for Bureau and Washington Field officials. This involves inspection (1) once a year at the residences, (2) twice a year at the telephone company exchange buildings, and (3) four times a year on all outside terminal appearances of the telephone lines where compromise is most likely.

Mr. Frederick H. Schmidt, Director of Security, HEW, by letter to the Director dated 10/23/69, advised Secretary Finch has requested installation of counter-measures on the telephones in the Secretary's office, that a security check be made of his telephone lines and that a microphone survey be made covering the most likely places of concealment. Letter attached.

The Bureau has conducted similar security checks for various Secretaries of HEW in the past. It is suggested the Bureau may wish to comply with the present request.

ACTION:

If approved, a security survey will be conducted for the Secretary of HEW at a time arranged through Frederick H. Schmidt.

SECURITY OF TELEPHONE LINES
SALT LAKE CITY DIVISION
CEDAR CITY RESIDENT AGENCY
CEDAR CITY, UTAH

EX-102

Reurlet 11/7/69, regarding security of the telephone line to the Cedar City Resident Agency (RA) in which you advise that the telephone company can provide the necessary security at a maximum cost of \$225.

Whenever possible non-multiple telephone lines should be obtained for Bureau communications. If the line serving the Cedar City RA is a "dedicated" line as mentioned in relet, it should not have multiples as such, but should only pass through terminal boxes without actually appearing on open terminals. If this is the case, it is sufficient to check these terminal boxes in accordance with Bureau instructions regarding security checks of telephone lines, unless special conditions warrant that additional security measures be taken.

Normally, additional security measures need not be taken inside telephone company exchanges which are manned by telephone company employees 24-hours a day or which are kept locked and are accessible only to telephone company employees.

If feasible, the frame room in the basement of the State Highway Building should be locked as suggested in relet to prevent unauthorized entry. It is not usually necessary to physically secure covers of manholes through which telephone cables pass since exposed line terminals usually do not appear inside manholes.

In view of above, it is suggested that you recontact the telephone company to obtain a new estimate based on reevaluation of RA telephone line security consideration and submit to the Bureau for approval.

FROM :

SAC, SALT LAKE CITY (66-517)

SUBJECT:

SECURITY OF TELEPHONE LINES
SALT LAKE CITY DIVISION
CEDAR CITY RESIDENT AGENCY
CEDAR CITY, UTAH

A recent survey of the telephone facilities of the Cedar City Resident Agency revealed that the services are listed as "essential" but there are no security precautions installed in the line running from the telephone company to the Cedar City Resident Agency. As the Bureau is aware, this Resident Agency was established in the Spring of 1969. By being declared "essential" the Mountain States Telephone Company provides immediate maintenance service in the event of service failure, but this classification does not imply to any form of security precaution on the line.

Examination of the facilities revealed that the line is a "dedicated line" extending from the frame room of the telephone building to the office space of the Cedar City Resident Agency located in the State Highway Department building approximately one and one half miles away. It was discovered that this line is exposed in seven different locations. In six of the locations the telephone lines "multiple" on the telephone poles in an area easily accessible to the public. The seventh location is in the frame room in the basement of the State Highway Department building where the telephone terminals to the office space are easily identified and accessible to anyone desiring to enter this particular area. There are no facilities presently available through which these terminals can be secured.

- 2 - Bureau
- 2 - Salt Lake City
- (1 - 66-517)
- (1 - 66-1766)

HVJ:ks

The line should be non-multiple for security. This is obviously not a dedicated line if the multiples are cut out into terminals. If it is pic cable and the Bureau pair merely passes through a boot, this OK. If the Bureau pair is cut out on terminals, then these should be eliminated, especially at the Highway Dept. location.

1 DEC 1 1969

COMM. SECT.
13

UNRECORDED COPY FILED IN 66-46-1

SU 66-517

Examination of the frame room in the telephone company building revealed that there is no security precaution on the frame itself nor are there any security facilities protecting handling the telephone lines leading away from the building in the underground cables. Extending from the building the line pair was identified as number 459, color white and blue from the telephone company to the first multiple, and brown and red from the first multiple to the Resident Agency. These lines were easily identifiable and were easily traced.

Marketing Division, Mountain States Telephone Company, conducted a survey and cost estimate to determine what it would cost to secure the Bureau telephone facilities. It should be noted that the Cedar City area is a rural farming community and very few, if any companies in the area, require security precautions necessary to Bureau operations, therefore, securing telephone lines is a special project to meet Bureau requirements. b6
b7C

The results of the telephone company survey would include securing the lines within the building, physically securing manhole covers and other access points to telephone cables, removing multiples from the telephone poles mentioned, and securing the frame room in the basement of the State Highway Department building. He stated that the maximum cost to the Bureau would be \$225.00. It is recommended that the Bureau authorize expenditure of \$225.00 to secure Bureau telephone facilities at the Cedar City Resident Agency and that this work be done as soon as possible.

Mr. Earl J. Thomas
Chief, Division of Compliance
Department of the Interior
Washington, D. C. 20240

Dear Mr. Thomas:

As requested in your letter to me of November 12, 1969, I have had Special Agents of the Federal Bureau of Investigation conduct a security check of the telephone facilities of Secretary of the Interior Walter J. Hickel. This involved the inspection of the instruments and associated facilities in his office and residence, in telephone company exchange buildings, and at all points of access outside the above locations. At the same time, telephone countermeasure devices were installed in the three instruments in the Secretary's office and in five instruments in his residence.

No irregularities were observed at the time of the survey.

Sincerely yours,

Mr. D. J. Brennan's 11/13/69 memorandum to Mr. Sullivan reported the receipt of a letter to the Director, dated 11/12/69, from Earl J. Thomas, Chief, Division of Compliance of the Department of the Interior. The letter advises that Secretary Hickel had requested Mr. Thomas to determine if the FBI would (1) conduct a security survey of his office and residence telephone service, and (2) install countermeasure devices (to prevent use of the telephones as microphones to pick up room conversation). The Director approved.

Through arrangements made by SA L. F. Schwartz (of the Liaison Section) with Mr. Thomas, personnel of FBI Laboratory made the requested telephone survey and countermeasure installations at the residence and the office on 12/8, 9, & 10/69, the earliest access dates which could be arranged because of illness of Secretary Hickel. This involved the inspection of a total of fifteen instruments and fifteen local and outside lines for both locations. No irregularities were observed at the time of the survey. No one at the Department has been advised of the results.

Mr. Thomas has advised that he would appreciate a written reply as to the results. A suggested letter to Mr. Thomas is attached. This matter has been coordinated with SA L. F. Schwartz of the Liaison Section.

RECOMMENDATION:

If approved, the Liaison Section will deliver the attached letter to Mr. Thomas, reporting the results of the telephone security survey and the installation of telephone countermeasure devices at the office and residence of Secretary Hickel.

TO : DIRECTOR, FBI
ATTENTION: FILES & COMMUNICATIONS,
COMMUNICATIONS SECTION

DATE: 12/4/69

FROM : SAC, SALT LAKE CITY (66-517)

SUBJECT: SECURITY OF TELEPHONE LINES
SALT LAKE CITY DIVISION
CEDAR CITY RESIDENT AGENCY
CEDAR CITY, UTAH

Re Salt Lake City letter to the Bureau, 11/7/69, and
Bureau letter to Salt Lake City, 11/28/69.

For the information of the Bureau, the Mountain States Telephone Company described the line servicing the Cedar City Resident Agency, identified as Line Pair 459, extending from the telephone company frame room to the Cedar City Resident Agency, as being a "dedicated line." The term "dedicated" as used by the telephone company describes an uninterrupted and committed line connecting the telephone company and the Cedar City Resident Agency. This line, even though dedicated, can and does appear on multiple-type terminals.

The facilities presently utilized at Cedar City are as follows:

Line Pair 459 leaves the telephone company in an underground cable surfacing a short distance from the telephone building. The cable is a "pick-type" cable carrying numerous telephone lines contained in a polyethylene weather shield. The cable lines first appear on a telephone pole located at 110 North Main in a Type 49 Multiple Terminal and Pair 459 is identified at this point. The cable then continues to the pole at 360 2 North Main; then to poles at 432 2 North Main, 740 2 North Main and 900 2 North Main, where in each location the pair appears on a Type 49 Multiple Terminal. The cable then extends to 880 1 North Main at the Highway Department Building and enters the basement frame room of the Highway Department Building, where Pair 459 branches off extending to the Cedar City Resident Agency office space.

REC 43

EX-117

15 DEC 5 1969

5010-108

SU 66-517

The "pick-type" cable is designed so that telephone linemen can cut into the cable at any point and "pick out" the particular pair they desire to terminate. The wires are identified and appear on the Type 49 Multiple Terminal which is widely used in the Bell Telephone System. The Type 49 terminal is not a box-type terminal, but rather a junction terminal located on the line itself close to the pole where located and is only covered by a heavy rubber shield protecting it from the weather. It is readily accessible to anyone who desired to climb the pole and examine the facility.

To secure the telephone facilities of the Cedar City Resident Agency, the telephone company will discontinue the line pair presently in existence and will utilize or install a dedicated line pair in a lead cable extending from the telephone building to the frame room of the Utah Highway Department. This line will not appear or be exposed at any point between the frame room of the telephone company and the frame room of the Highway Department Building. The company will secure the telephone frame in the basement of the Highway Department by housing it in a locked container available only to authorized personnel.

The cost estimate pertains to the securing of the lines and frame room as described. Cost of securing the frame room at the telephone company building and manhole covers is negligible and would not affect the estimated cost of securing the lines. The telephone company building at Cedar City is manned twenty-four hours a day and is secured under locked conditions, being available only to authorized telephone company personnel.

who was recontacted regarding this matter as suggested in the referenced Bureau letter, stated that the \$225 estimate is an absolute maximum and that there is a possibility, depending on the amount of labor, that the actual cost could be less.

DATE: 1/23/70

On 1/15/70 and 1/16/70, a security check was made of the telephone and teletype facilities of the Sacramento Office. This security check included telephone facilities of the SAC and ASAC and no delinquencies were noted. During this period, a search was made of the space in the new Federal Building that will be occupied by the Sacramento Office later this year. This search was for the purpose of discovering clandestine listening devices and concealed wiring.

An additional search of this new office space will be made prior to occupancy by the Sacramento Division. An examination will be made of the new telephone and teletype facilities when this examination is made, probably in March, 1970. The wiring for the telephone system has not yet been installed in this new space.

SURVEYS

By 1/28/70 memorandum to Mr. Tolson, Mr. DeLoach reported a request by the Administrator of Veterans Affairs, Donald E. Johnson, on 1/27/70, for a security survey of his office telephone lines. The Director approved.

b6
b7C

On 2/12/70, pursuant to arrangements made by Veterans Administration Special Projects Officer, Special Agents of the FBI Laboratory completed a check of the telephone facilities at Mr. Johnson's office, Room 1006, Veterans Administration (VA), 810 Vermont Avenue, Washington, D. C. This involved the inspection of three telephone instruments, one unlisted outside line, three VA extensions and several intercommunication lines (all connected to Mr. Johnson's office instrument), and included an inspection of the facilities in his office, in the telephone company exchanges, and at all points of access outside the above locations.

In view of the confidential basis of this check as set forth in Mr. DeLoach's memo 1/28/70, it is understood a written report is not desired.

ACTION:

For referral to Mr. DeLoach for handling advice to Mr. Johnson. The results of the check were negative.

Don Johnson, Administrator of Veterans

Affairs, called 1/27/70 and stated he would deeply appreciate it if the Director could allow Laboratory experts to check his personal office for wiretaps. He stated he discusses many matters of a confidential nature on the phone and, quite frankly, some of these matters concerned employees whom he had "inherited" when he took over as Administrator of Veterans Affairs. He stated he hated to impose on the FBI, but if at all possible would appreciate having this check made.

Johnson is extremely cooperative, a close friend, and has for a long time been an ardent supporter of the Director and the FBI. He is a Past National Commander of the American Legion and during his term in office did everything possible to support the FBI. I feel this could be done on a confidential basis and that Johnson will be very appreciative.

ACTION:

That the Director consider allowing this matter to be handled for Don Johnson.

By letter to the Director dated 1/22/70, Mr. Lester P. Condon, Assistant Secretary for Administration, Department of Housing and Urban Development (HUD), respectfully requested that FBI personnel make a security survey of the office and residence telephone systems of Secretary George W. Romney. The Director approved.

Security Surveys

On 2/13/70, through arrangements made by Mr. William G. Liekweg, Chief, Security Branch, Office of Investigation at HUD, FBI Laboratory personnel completed the requested survey at Secretary Romney's offices and residence. This involved inspection of a total of 21 telephone sets and 40 local and outside lines for both locations.

No evidence of tampering was detected at the time of the survey. No one at HUD has been advised of the results.

Mr. Condon advised he would appreciate a written reply as to the results. A suggested letter to Mr. Condon is attached. This matter has been coordinated with SA [redacted] of the Liaison Section.

RECOMMENDATION:

If approved, the attached letter to Mr. Lester P. Condon, reporting the results of a security survey of the telephone facilities at the offices and residence of Secretary George W. Romney, will be delivered by the Liaison Section.

Mr. Lester P. Condon, former Special Agent, Assistant Secretary of the Department of Housing and Urban Development (HUD), by attached letter to the Director dated 1/22/70, has respectfully requested that FBI personnel make a security survey of the telephone facilities at the office and residence of Secretary George Romney.

No surveys have been conducted for officials of HUD in the past. However, when Mr. Condon formerly was the Inspector General of the Department of Agriculture, telephone security surveys were conducted for Agriculture officials at his request. Similar surveys have been conducted for several different Cabinet members in the past, none of which have been performed on a reimbursable basis.

ACTION:

If approved, office and residence telephone security surveys will be conducted for the Secretary of Housing and Urban Development at a time arranged through Mr. William G. Liekweg, Chief, Security Branch, Office of Investigation.

Honorable Lester P. Condon
Assistant Secretary
Department of Housing and Urban Development
Washington, D. C. 20410

Dear Mr. Condon:

In keeping with the request in your letter to me of January 22, 1970, a security check of the telephone systems at the offices and residence of Secretary George W. Romney has been made by Special Agents of the Federal Bureau of Investigation. This included inspection of the instruments and associated facilities at his offices and apartment, telephone company exchange buildings, and all points of access outside the above locations.

No evidence of tampering was observed at the time of the check.

Sincerely yours,

John Edgar Hoover
Director

Mr. Winslow Joy, Administrative Services, Administrative Division, Department of Justice, has made a telephonic request to SA [redacted] Administrative Division, that the FBI conduct a security sweep of the suite of offices occupied by the Attorney General (AG) and Deputy Attorney General (DAG) for listening devices. He said the check should also include telephone lines to these 2 offices. [redacted] indicated it had been some time since a sweep of these 2 offices had been made and he would at this time also request that a schedule be set up within the FBI to have the sweep made of these offices on a random day each month. [redacted] said he should be contacted whenever FBI experts are to enter the offices of the AG or DAG so that he can arrange for these officials to be absent from their offices at the time sweep is made.

[redacted] was advised that due to the nature of the request and the offices involved, a memorandum setting forth the Department's request should be addressed to the Director for his consideration. [redacted] stated he would submit a formal request.

For information.

~~SECRET~~

Reference is made to D. J. Brennan's 5/8/70 memorandum to Mr. Sullivan setting forth a request by Mr. Earl Thomas, Chief, Division of Compliance, Department of Interior, for an emergency check of the office telephones of Secretary Walter Hickel. He explained that the Secretary had talked with [redacted] at the White House on the evening of 5/7/70, and that matters discussed in this telephone call appeared in the New York Times of 5/8/70. The Director approved.

b6
b7C

On 5/8/70, SA [redacted] of the FBI Laboratory conducted the security survey. At the request of Mr. Thomas, it was limited to the Secretary's White House telephone line within the Secretary's office suite and the telephone equipment rooms in the Department of Interior building. (Mr. Thomas explained that Secret Service personnel were making a check on the White House end of the line.)

No evidence of tampering was observed. Mr. Thomas, who remained throughout the survey, requested and was advised of the above results by SA [redacted]

RECOMMENDATION: For information.

Earl Thomas, Chief, Division of Compliance, Department of the Interior, telephoned this afternoon to state there has been a leak in a telephone call between Secretary Hickel and the White House. He asked that we check the Secretary's telephones and said Secret Service is making an immediate check of the White House phones.

Thomas reported that Secretary Hickel talked with Mr. Ehrlichman at the White House on the evening of 5/7/70 and discussed his reasons for addressing the letter to the President which has received such wide-spread publicity (this letter urged the President to pay heed to the voice of youth). Matters discussed in this telephone call appear on page one of the "New York Times," 5/8/70. Secretary Hickel has requested that his telephones be examined and the White House is having the Secret Service conduct a similar examination. The Laboratory advises that they can conduct the requested survey if the Director approves.

ACTION:

If approved, the Laboratory will promptly examine telephone equipment in the office of the Interior Secretary Hickel.

In accordance with a Bureau-approved request from Frederick H. Schmidt (Director of Security at HEW and former Special Agent), on 5/21 and 22/70 FBI Laboratory personnel conducted a microphone and telephone security survey in the office of Secretary Robert H. Finch on the basis of availability of facilities arranged by Schmidt. In keeping with the latter's request, countermeasure devices (to prevent telephones from being used as microphones) were installed in the Secretary's instruments, and the microphone check was limited to places of most likely concealment.

No evidence of microphone or telephone eavesdropping devices was found.

The check included the large office and two small rooms used personally by the Secretary, nine office lines, two White House lines, and eight telephone instruments.

RECOMMENDATION:

That the Liaison Section advise Mr. Frederick H. Schmidt of the results of the microphone and telephone survey. Schmidt is aware of the installation of countermeasure devices in the Secretary's telephone instruments.

By letter to the Director dated 5/26/70, Joseph M. Kelly, Director of Investigations and Security, Department of Commerce, advised that on 6/15/70 Secretary Stans was moving into temporary office space (for about four months while his regular space is renovated). The Secretary inquired as to whether it would be possible for FBI personnel to make a security survey of his new space for both clandestine microphones and wiretaps. Kelly is a former Special Agent and the Bureau's principal liaison contact on investigative and personnel matters at Commerce.

The Bureau has conducted similar checks for various Secretaries of Commerce in the past, and with the Director's approval made a survey of the office and residence telephone facilities of Secretary Stans shortly after he took office.

ACTION:

If approved, FBI Laboratory personnel will make a microphone and telephone security survey in the office of the Secretary of Commerce at a time arranged through Joseph M. Kelly. *Wa*

Dear Mr. Hoover:

SECURITY OF TELEPHONE SERVICES

My Director of Security, Fred Schmidt, has informed me of the fine services rendered by the Federal Bureau of Investigation in conducting a security survey of my office and its telephone lines.

Special Agents [redacted] Wilbur G. Stevens in conducting this survey, handled the operations promptly, efficiently, and on extremely short notice.

The assistance and cooperation of the Federal Bureau of Investigation in this and other matters of mutual interest to this Department is greatly appreciated.

Sincerely,

Robert H. Finch

TO : Mr. Conrad *[initials]*
FROM : W. W. Bradley *[initials]*

DATE: 6/24/70

SUBJECT: SECURITY SURVEY, OFFICE OF
SECRETARY OF COMMERCE
MAURICE H. STANS *[initials]*

By 5/28/70 memorandum to you, I reported that Joseph M. Kelly (former SA), Director of Investigations and Security, Department of Commerce, had advised that Secretary Stans had inquired whether the FBI could make a microphone and telephone security survey of the temporary space he was occupying while his regular office is being renovated. The request was approved.

On 6/22 and 6/23/70, the earliest dates arranged by Mr. Kelly, FBI Laboratory personnel made the requested survey in the temporary office of Secretary Stans, Room 5132 at the Commerce Department. At Mr. Kelly's request, the microphone survey was limited to the most likely places of concealment, in order to preclude the necessity of damaging building surfaces. The telephone survey involved two instruments and six lines, with inspection of the terminal appearances being made in the Secretary's office, in telephone company exchanges, and at all points of access outside of the above-mentioned locations.

No evidence of clandestine listening devices was observed at the time of the survey. Mr. Kelly was not advised of the results.

RECOMMENDATION:

That the Liaison Section of the Domestic Intelligence Division advise Mr. Joseph M. Kelly of the results of the above survey.

ANCHORAGE DIVISION
HEADQUARTERS CITY

On 6/15/70, SA [redacted] a sound trained agent, traveled to Anchorage, Alaska, where he conducted a security check of the two main lines servicing the Anchorage Office, 272-6414 and 272-6415, and ATSS phone 752-6205, as well as a security check of the space normally occupied by the U. S. Commissioner, which is temporarily being used by a departmental attorney.

The service was found to be secure, with no foreign attachments, and the space of the U. S. Commissioner was likewise found to be secure.

It should be noted that the security check of the Anchorage Division was restricted to 3 telephone lines listed above.

By letter to the Director dated 8/28/70, Joseph M. Kelly, Director of Investigations and Security, Department of Commerce, advised that during the evening of 8/27/70 forcible entry was made into the suite of offices of Secretary of Commerce, Maurice H. Stans. Because of the possibility that entry was made for the purpose of installing a clandestine listening device in the Secretary's Office, it was requested that Bureau personnel conduct a security survey of this space. The Director approved this request.

On 9/2/70, FBI Laboratory personnel completed the requested survey in the office of Secretary Stans. No evidence of clandestine listening devices was observed at the time of this survey. Mr. Kelly advised he would appreciate a written reply as to the results. A suggested letter to Mr. Kelly is attached.

RECOMMENDATION:

That the attached letter to Mr. Joseph M. Kelly, reporting results of a Security Survey of Secretary of Commerce Maurice H. Stan's Office on 9/2/70, be approved.

Dear Mr. Kelly:

In keeping with the request in your letter to me of August 28, 1970, a security survey of the office of Secretary Maurice H. Stans has been made by Special Agents of the Federal Bureau of Investigation. No evidence of clandestine listening devices was observed at the time of this check.

Sincerely yours,

J. Edgar Hoover

Memorandum

TO : DIRECTOR, FBI

DATE: 9/8/70

FROM: SAC, BUFFALO (66-1702) (P)

SUBJECT: SECURITY OF TELEPHONE SERVICES
FACILITIES
BUFFALO DIVISION

As the Bureau is aware, the telephone facilities and office space of the Niagara Falls Resident Agency have been checked since early 1969, on a bimonthly basis by Buffalo's soundman (a Resident Agent assigned in Rochester, New York) to insure the security of these facilities.

The frequency of these checks was occasioned by the concentrated drive against Organized Crime in Western New York, as it was felt extraordinary efforts were necessary to prevent any penetration of our operations by those already arrested or under investigation. Evidence over the years indicated they are entirely capable of such activities to promote their own activities and to hinder prosecution.

During the past 18 months, these additional and special checks have failed to detect any indication of intrusion or any attempt at intrusion of the Niagara Falls Resident Agency. While concentrated investigation continues to be directed against Organized Crime in this area, it is apparent these checks have consumed substantial time of the soundman, which might better be directed to other matters. *dw*

The security of the office remains a major consideration, however, in the interests of economy, without jeopardizing security, I have instructed that future security checks of the Niagara Falls Agency be conducted quarterly on a strictly unannounced and unscheduled basis.

Because of additional concentration of efforts in the field of Organized Crime in the Rochester, New York, Resi-

SECURITY SURVEYS

SUBJECT: REQUEST FOR ELECTRONIC
SWEEP OF ATTORNEY GENERAL'S QUARTERS

Bradley/Ren

Reference is made to my 10/15/70 memorandum to you reporting a request for a microphone security survey of the Attorney General's Office, contained in a 10/15/70 Departmental memorandum to the Director from Sol Lindenbaum, Executive Assistant to the Attorney General.

Pursuant to arrangements made through [redacted] the above survey was made on 10/16/70 by Special Agents of the FBI Laboratory. At [redacted] request, in order to reduce the necessity of possible damage to building surfaces, the check was limited to those locations in which microphones would most likely be concealed. Five rooms, seven telephone instruments, and nine telephone lines were included.

b6
b7C

No evidence of any eavesdropping devices was detected at the time of the survey. No one in the Attorney General's Office was advised of the completion of the check.

RECOMMENDATION:

dw

That the Attorney General's Office be advised of the results of the above survey. A memorandum to the Attorney General is attached for approval.

On 10-14-70, Winslow Joy, Security Officer, Department, made a telephonic request to SA [redacted] Administrative Division, that the FBI conduct an electronic sweep of the Attorney General's Office. He said he should be contacted whenever FBI experts enter the Attorney General's Office so he could make necessary arrangements. b6
b7C

A check with the Laboratory Division disclosed that on at least one previous occasion a check was made of telephone lines to the Attorney General's Office, but no record can be located of a previous electronic sweep of the walls for concealed microphones.

[redacted] was advised that due to the nature of his request, a memorandum setting forth the Department's request should be addressed to the Director for his consideration. He stated he would arrange to have such a formal request submitted. mz

The Honorable
J. Edgar Hoover
Director
Federal Bureau of Investigation
Washington, D. C. 20535

Dear Mr. Hoover:

Telephone security checks

Last February 1, two of your experts made a telephone security check in my office. I was most appreciative of your kindness and cooperation in doing this, for I was quite troubled at the possibility of information leaks. The result eased my mind considerably at that time. Now, however, I am again concerned, not only about the telephone security in my office, but also in the offices of Mr. Fred Rhodes, my Deputy Administrator, Mr. Rufus Wilson, my Associate Deputy, and [redacted] my Special Assistant. These key VA officials and I share information which is highly sensitive and confidential, even though not classified. They act for me in my absence. We use the telephone extensively and we cannot tolerate any electronic surveillances.

I would be very grateful if you would recheck my telephones, and also examine those in the offices of the three officials mentioned above. Although I realize that you have a heavy workload and many commitments, I have no other source so reliable and helpful to whom I can turn. We are continually appreciative of our long-standing excellent relations with the FBI. So long as I am the VA Administrator, we will support you and the important work at your Bureau.

If you can accommodate my request, Mr. MacDonald, telephone Code 148, Extension 2641, can make whatever arrangements you desire. I will appreciate your consideration.

I might add that I have read your provocative monthly message re assaults on police officers in the October 1970 FBI Law Enforcement Bulletin, and I thoroughly agree with your views.

Sincerely,

DONALD E. JOHNSON
Administrator

By letter to the Director dated 10/15/70, Donald E. Johnson, Administrator of Veterans Affairs, requested that Bureau personnel conduct a security check of his office telephone service as well as that of Fred Rhodes, Deputy Administrator, Rufus Wilson, Associate Deputy Administrator, and Special Assistant. The Director approved this request.

Contact with appropriate officials of Veterans Administration was made promptly, and in accordance with schedules provided by them, checks were made at earliest dates the various offices became available. This survey has now been completed. No evidence of tampering was observed at the time of this survey.

A suggested letter to Donald E. Johnson, Veterans Administration, Administrator, is attached reporting the results of this security survey.

RECOMMENDATION:

That the attached letter to Donald E. Johnson, Administrator of Veterans Affairs, reporting results of the telephone security survey of his office and that of his assistants be approved.

My dear Mr. Chairman:

In keeping with the telephonic request from your office on November 30, 1970, a security survey of your telephone facilities at the Rayburn House Office Building has been made by Special Agents of the Federal Bureau of Investigation.

BY SPECIAL
MESSENGER

This survey was completed on December 1, 1970, and I am happy to advise that no evidence of tampering was observed. For your information, it has been determined that a telephone company employee was in your office on November 25, 1970, for the purpose of verifying telephone service terminating in your office.

Sincerely yours,

Edgar

Reference is made to memorandum J. P. Mohr to Mr. Tolson dated 11/30/70 setting forth a request by [redacted], Congressman Rooney's Administrative Assistant, for a security survey of the telephone service in the Congressman's office.

b6
b7C

On 12/1/70, SA's [redacted] Wilbur G. Stevens conducted this survey. No evidence of tampering was observed.

In connection with this survey, inquiry was made of [redacted] repair foreman of the C & P Telephone Company, assigned to the Rayburn Building, regarding any special telephone company activities currently taking place in the Rayburn Building. [redacted] advised that a project is in progress to verify all telephone lines which run from the individual Congressmen's offices to terminations within the building. This is being done in order to facilitate a more orderly changeover of telephone service brought about by biennial elections in Congress. [redacted] stated that this verification process has now been completed in the Rayburn Building.

[redacted] Administrative Assistant to Congressman Rooney, was advised that no tampering was observed of the Congressman's telephone service. She was also informed of the line verification procedures conducted by the telephone company, it being noted that the unusual activities of a telephone man in the Congressman's office 11/25/70 raised concern regarding security of Chairman Rooney's telephone lines.

RECOMMENDATION:

DEC 8 1970

That the attached letter to Congressman Rooney, reporting results of a telephone security survey of his office on 12/1/70, be approved.

[redacted] Congressman Rooney's Administrative

Assistant, called me this morning and stated that an alleged telephone man came in to the office on Wednesday, November 25, 1970, stating he was from the telephone company and desired to check the Congressman's lines to the main box so they would be able to identify the circuits if and when the Congressman's Office was moved.

[redacted] told me she failed to ask the man for credentials; however, she was present during the time he was in the office and she observed him dismantling one of the phones. She noted when he left the office that he did not proceed to any other Congressman's office, which made her suspicious. She also stated that Chairman Rooney has no intention of moving from his present location in the Rayburn Building.

She stated she became so concerned about the matter that she mentioned it to Chairman Rooney and he instructed her to call me and request that the FBI check the telephones in his office to see whether they have been tampered with.

RECOMMENDATION

It is recommended that the Laboratory promptly arrange to check the telephones in Chairman Rooney's Office to determine whether they are in proper working order or whether they have been tampered with.

Mr. Nathaniel E. Kossack
The Inspector General
U. S. Department of Agriculture
Washington, D. C. 20250

Dear Mr. Kossack:

In keeping with the request in your letter to me of January 25, 1971, I have had a security survey made by Special Agents of the Federal Bureau of Investigation of the residence telephone facilities of Secretary of Agriculture Dr. Clifford M. Hardin. This included an inspection of the instruments and associated telephone facilities in his residence, in telephone company exchange buildings, and at all points of access outside the above locations. No evidence of tampering was observed at the time of the check.

In addition, countermeasure devices were installed in instruments in the living room and master bedroom where of your office indicated that confidential discussions would most likely take place.

SECURITY SURVEY AND COUNTERMEASURES FOR
RESIDENCE TELEPHONES OF SECRETARY OF
AGRICULTURE, DR. CLIFFORD M. HARDIN

Wash DC
7/11/71
5m
b6
b7C

By letter to the Director dated 1/25/71, Nathaniel E. Kossack, Inspector General of the Department of Agriculture (former Special Agent) advised that Secretary Hardin expects to move from his present residence in Sumner, Maryland, to his new residence in Kenwood, Maryland, during the first week in February. Kossack stated that it would be helpful if Bureau personnel could (1) make a security check of the telephone facilities at the new residence and also (2) install countermeasure devices in the telephones (to prevent their being used as microphones to pick up room conversation).

With the Director's approval, in February 1969, we previously made a residence telephone security survey and countermeasure installation for Secretary Hardin. Inspector General Kossack has been most cooperative on investigative matters with the Bureau.

ACTION:

If approved, FBI Laboratory personnel will contact the Inspector General's office and make the necessary arrangements to do the telephone security work at Secretary Hardin's new residence.

Dear

Pursuant to your recent request, Special Agents of the Federal Bureau of Investigation have completed a microphone and telephone security survey of your office in the Federal Triangle Building. This included a check of those places in your office where microphones would most likely be concealed and an inspection of all telephones and associated equipment at your office, telephone company exchange buildings, and all points of access outside the above locations.

No indication of microphone or telephone eavesdropping devices was found.

Sincerely yours,
J. Edgar Hoover

[REDACTED] in charge of the Internal Security Division, called today and said that he was desirous, if possible, of having a check made of his telephones and a sweep of his office space to be sure that his telephone lines are not tapped and that no hidden microphone is planted in this office.

[REDACTED] is very security conscious and during the past few weeks has instituted several changes for the purpose of improving the security of the space being used by the Internal Security Division. In this connection, it might be noted that the Internal Security Division obtains most of its information from the FBI, and therefore, any steps to improve the security of that division result in greater security with reference to our reports, information and cases.

It would, therefore, appear that it would be to our interest as well as the interest of the Internal Security Division of the Department to be sure there has been no penetration of [REDACTED] office space, and it is believed it would be desirable that the Laboratory make the necessary arrangements to check the telephones and the space occupied by [REDACTED] office. It is contemplated that such a search would relate only to [REDACTED] own office and not to space occupied by other representatives of the Internal Security Division.

RECOMMENDATION:

That the Laboratory make the security check of [REDACTED] office as requested.

SUBJECT: REQUEST OF DEPUTY AG KLEINDIENST
FOR ELECTRONIC CHECKS

At 6:10 p.m., last night, Deputy AG Kleindienst called me. He said he wanted me to convey to the Director some requests from the Attorney General. These requests are as follows:

1. The Attorney General would like the FBI to check the telephone in his office and in the office of his secretary, and also "sweep" that same area for any possible electronic devices which may have been installed.

He would like to have this done on Friday evening, 1/29/71, after he leaves at about 6:15 p.m. A check is to be first made with [redacted] so that she will arrange to have the alarm turned off when the men enter the space.

2. The Deputy AG advised that the Attorney General would like the same thing done in Kleindienst's office, also on Friday evening, 1/29, after work when the office help have departed. In this case the contact person will be Mr. Harlington Wood, Jr., Associate Deputy Attorney General.

Mr. Kleindienst's home is also to be checked in the same manner. He will be away, but his wife will be home, and they would like to have this done on Friday, 1/29, during the day when the children are at school.

3. The Attorney General would like to have the office of Dr. Henry Kissinger at the White House, as well as Kissinger's home, also checked for any kind of electronic devices which may have been installed. The contact to work through in this case is Mr. Russell Ash, former Bureau Agent, now in Dr. Kissinger's office, and who can be trusted absolutely.

ENCLOSURE

WCS:CSH (4)

SI-117
REC-18

CONTINUED-----OVER
1 FEB 8 1971

97 FEB 11 1971

Mr. Tolson

Mr. Kleindienst said the AG would like to have these checks made very quietly, in a low key, and with knowledge thereof limited to as few persons as possible. He indicated also that the results were to be transmitted verbally.

My suggestion is that after this work has been done the Director, either personally or on the telephone, tell the Attorney General of the results and he, in turn, could transmit them to the proper person.

RECOMMENDATION -

That on approval of this memorandum, it be referred to the Laboratory for handling.

DATE: February 2, 1971

FROM :

W. W. Bradley

SUBJECT:

REQUEST OF DEPUTY AG KLEINDIENST
FOR ELECTRONIC CHECKS.

The Director approved Mr. Sullivan's 1/26/71 memorandum to Mr. Tolson in which Mr. Sullivan reported that Attorney General John N. Mitchell and Deputy Attorney General Richard G. Kleindienst had requested: (1) Microphone and telephone security surveys of the office of the Attorney General; (2) Microphone and telephone security surveys of the office and residence of Deputy Attorney General Kleindienst; and (3) Microphone and telephone security surveys of the office and residence of Assistant to the President for National Security Affairs, Dr. Henry A. Kissinger.

Mr. Harlington Wood, Jr., Associate Deputy Attorney General, who was designated to handle arrangements for the Justice Department officials, advised SA [redacted] on 1/29/71 that the request for the surveys in the Attorney General's office was being canceled until renewed by Mr. Kleindienst or Mr. Wood at a later date. Arrangements for the surveys for Dr. Kissinger were made on 1/29/71 with [redacted] Appointments Secretary, at which time he advised that no microphone security check should be done in Dr. Kissinger's Office, and the telephone check should be limited to the confines of the office. At the request of both Mr. Wood and [redacted] the microphone security surveys were limited to those places where listening devices would most likely be concealed.

FBI Laboratory personnel conducted the requested surveys on 1/29-30/71 and 2/1/71. No evidence of concealed listening devices or tampering with telephone facilities was detected at the time of the checks. Only Bureau personnel has been advised of the above results.

RECOMMENDATION:

1 FEB 8 1971

That Deputy Attorney General Richard G. Kleindienst and Assistant to the President, Dr. Henry A. Kissinger, be verbally advised of the above results of the microphone and telephone security surveys of their offices and residences.

MEMORANDUM FOR MR. TOLSON
MR. SULLIVAN
MR. MOHR
MR. BISHOP
MR. CONRAD

Deputy Attorney General Richard G. Kleindienst returned my earlier call to him. I advised him that I wanted to let him know, I didn't want to put this in a memorandum, that we had checked his office and his home for any possible wiretaps and found nothing. Mr. Kleindienst thanked me.

I said I had also advised Dr. Henry Kissinger that we had done the same for him and found nothing.

I told Mr. Kleindienst that the check for the Attorney General (John N. Mitchell) was rescinded by Mr. Wood. Mr. Kleindienst said he understood this was done on an extensive basis last October and asked if I think it necessary to do again now. I answered with these jackals now, I wouldn't put anything past them. I told him about the Jack Anderson column in this morning's Washington Post, in which Anderson related information gathered by Charles Elliott to the effect that I had consulted Dr. Marshall de G. Ruffin, a psychiatrist. I said I had been undecided whether to sue him for libel or not. Mr. Kleindienst said, if he spelled my name right, to leave it alone. I also mentioned the Life Magazine reporter and [redacted] who, for the last two years, has been digging into all kinds of things about the Bureau and myself, that he wrote an article about former Agent [redacted]

b6
b7C

EX-111 REC 11 62-97308-545 FEB 9 1971

I mentioned that I sent down to him (Kleindienst) a draft of a letter to send to Senator (George S.) McGovern. I related briefly the background of the [redacted] matter, that he was attending John Jay College, wrote a critical letter to a professor, was suspended, put on probation and transferred from New York to Butte, that he resigned and I accepted his resignation with prejudice on the basis that he had used atrocious judgment. I said I wasn't going to allow a member of our organization to indulge in such behavior. I told Mr. Kleindienst that one of his assistants asked us to prepare an answer to McGovern's letter. Mr. Kleindienst asked if that would be coming down before 11:30, and I said I had already sent it out.

Reference is made to memorandum 1/19/71 J. A. Sizoo to Mr. C. D.

Brennan reporting a request by [REDACTED] for a microphone and telephone security check of the latter's office. The Director approved.

Pursuant to arrangements made by Mr. Sizoo, the requested survey was conducted by FBI Laboratory personnel on February 2 and 3, 1971, after renovation of [REDACTED] office was completed. The microphone survey was limited at [REDACTED] request to places where listening devices would most likely be concealed. The telephone facilities were checked in the office, telephone exchange buildings, and at all points of access outside the above locations.

No evidence of concealed listening devices or tampering with the telephone facilities was detected at the time of the check.

RECOMMENDATION:

That the attached letter to [REDACTED] reporting the results of the microphone and telephone security check of his office on 2/2-3/71 be approved.

By letter to the Director dated January 7, 1971, Mr. Joseph M. Kelly, (former Special Agent), Director of Investigations and Security, Department of Commerce, requested that Bureau personnel conduct a microphone and telephone survey of the newly renovated office of Secretary of Commerce Maurice H. Stans. The Director approved.

On 2/8 and 2/9/71, pursuant to arrangements made by Mr. Kelly, after all work was completed and the Secretary's schedule permitted, FBI Laboratory personnel conducted a microphone and telephone survey in Secretary Stans' office. No evidence of eavesdropping devices was observed at the time of the check. A suggested letter to Mr. Kelly is attached as a result of his request for a written report of the results.

RECOMMENDATION:

That the attached letter to Mr. Joseph M. Kelly, reporting the results of the microphone and telephone security survey on 2/8 and 2/9/71, of the office of Secretary of Commerce Maurice H. Stans, be approved.

While discussing other matters with Congressman Bow today, I mentioned to him again the subject matter that he had previously brought up with me, namely having a technical check made of his office in the Capitol and his office in the Rayburn Building. I told him that we planned to have a technical check made of the Subcommittee hearing room and that if it was O. K. with him, we could check his offices as well. He said that was just fine and that if he was not in town during the George Washington holiday when we planned the check, we could get in touch with his private

_____ or his administrative assistant, _____. He said they would have keys to the offices and he requested that we check both his office in the Capitol, Room H323 and his office in the Rayburn Building, suite 2182.

RECOMMENDATION

It is recommended that when the Laboratory makes the check of the hearing room that they also check the offices of Congressman Bow.

Wash. DC
While discussing other matters with [redacted] Clerk of our House Appropriations Subcommittee, he indicated that the Chairman would appreciate it if the Director could arrange to have the hearing room in which he gives his testimony surveyed for any listening devices as we have done in past years. [redacted] pointed out that the best time to do this, he felt, would be during the forthcoming Lincoln-George Washington Holidays recess from February 10 to February 17.

[redacted] stated also that [redacted] Director of the Professional and Clerical Staff, had asked him to get in touch with the writer at the instructions of Chairman Mahon to see if the Defense Subcommittee Room and the Main Committee Room of the Appropriations Committee could be surveyed during the recess period mentioned above. It was pointed out that the Director has approved similar surveys in past years at the request of Chairman Mahon. The Laboratory Division has advised that personnel is available without conflict in other commitments to perform these surveys, should the Director approve. The security survey for Chairman Bow's offices will be coordinated and handled at the same time.

RECOMMENDATION:

If the Director approves, arrangements will be made with [redacted] and [redacted] to conduct these surveys during the recess period.

Reference is made to Mr. N. P. Callahan's memorandum of 2/9/71 to Mr. J. P. Mohr in which it was reported that [redacted] Clerk of the Bureau's Appropriations Subcommittee, had advised that Chairman Mahon of the House Appropriations Committee would appreciate having a telephone security survey made of his office suite, the Main Committee Room, and the Bureau's Subcommittee Room. The Director approved.

Pursuant to arrangements made by Mr. Callahan with [redacted] Director of the Professional and Clerical Staff, and [redacted] Clerk of the Bureau's Subcommittee, FBI Laboratory personnel made a telephone security survey within the confines of (1) Mr. Mahon's office suite (Rooms H216, H217, and H218) on 2/12/71, and (2) the Bureau's Subcommittee Room (H310) on 2/16/71. No evidence of tampering or of listening devices was observed at the time of the checks. [redacted] instructed that it would be unnecessary to make a check of the Main Committee Room (H140) due to a change in plans.

[redacted] was present at the conclusion of the work in H216, H217, and H218 and inquired as to the results. He was advised by Special Agent [redacted] that no evidence of tampering with the telephone facilities had been observed at the time of the check. Mr. Callahan was promptly informed (1) on 2/12/71 of the results and the fact that [redacted] had been advised orally regarding H216, H217, and H218; and (2) on 2/16/71 of the results for the Bureau's Subcommittee Room.

RECOMMENDATION:

Reference is made to J. P. Mohr's memorandum to Mr. Tolson, dated 2/5/71, in which it was reported that Congressman Bow had inquired whether a security check could be made of his two offices at the same time one was made of the Bureau's Subcommittee hearing room during the George Washington holiday. The Director approved.

Pursuant to arrangements made with [redacted] Administrative Assistant to the Congressman, on 2/16/71, FBI Laboratory personnel conducted a microphone and telephone security survey of Congressman Bow's Rayburn Building office (Suite 2182) and his Capitol Building office (Room H 323). b6
b7C

At [redacted]'s request, the microphone survey was limited to those places in which microphones would most likely be concealed. The survey included all telephones and related equipment within the confines of the offices. No evidence of eavesdropping was observed at the time the two offices were checked. No one was advised of the results.

RECOMMENDATION:

That the attached letter to Congressman Frank T. Bow, advising him of the results of a security check of his two offices, be approved.

Reference is made to my 1/28/71 memorandum to you reporting a letter to the Director dated 1/25/71 from Nathaniel E. Kossack, Inspector General of the Department of Agriculture (former Special Agent) in which the latter requested a security survey by Bureau personnel of the telephones in Secretary Hardin's new residence in Kenwood, Maryland. The Director approved.

Through arrangements made with Mr. Fred Hallford (former SAC), Assistant Inspector General in Mr. Kossack's Office, FBI Laboratory personnel conducted the requested survey on 2/11 and 2/12/71. No evidence of tampering was observed at the time of the check, which involved five instruments and two lines. Countermeasure devices (to prevent the telephone from being used as a microphone to pick up room conversation) were installed in the instruments in the living room and master bedroom.

RECOMMENDATION:

That the attached letter be approved to Nathaniel E. Kossack, Inspector General, Department of Agriculture, reporting completion of the residence telephone security survey and countermeasure installation for Secretary of Agriculture Dr. Clifford M. Hardin.

Security of Telephone Services

In my 2/2/71 memorandum to you, I reported that the Director had approved a request by Attorney General Mitchell and Deputy Attorney General Kleindienst for microphone and telephone security surveys of their offices. The survey for Mr. Kleindienst was completed and reported on schedule, but the one for Mr. Mitchell was postponed by Mr. Harlington Wood, Jr., Associate Deputy Attorney General, until changes in the Attorney General's telephone system were completed.

Pursuant to subsequent arrangements made by the Director and yourself with [redacted] Office of the Attorney General, FBI Laboratory personnel made the requested survey in the Attorney General's office on 2/25 and 2/26/71. The microphone check was limited to the most likely places of concealment and the telephone facilities were inspected at the office, telephone company exchanges, and all points of access outside the above locations. No indication of eavesdropping devices or tampering with telephone facilities was observed at the time of the survey.

RECOMMENDATION:

Results be orally furnished to Attorney General pursuant to original request.

SUBJECT: INTELLIGENCE EVALUATION COMMITTEE
INTERNAL SECURITY - MISCELLANEOUS

The purpose of this memorandum is to advise of an inquiry received from the captioned Committee as to whether the Bureau would desire to make a security "sweep" of the space occupied by the Committee in the Internal Security Division of the Department to make certain no listening devices are found.

This morning Mr. John F. Doherty, Executive Director of the captioned Committee, contacted me and advised that the space which will be occupied by the staff of the Intelligence Evaluation Committee is almost ready for occupancy. This space is located on the 4th floor of the same building in which the Domestic Intelligence Division is located (9th and D Streets, Northwest) and is part of the overall space occupied by the Internal Security Division of the Department. Mr. Doherty stated that since much of the information which will come into the hands of the Committee will be in the nature of communications intelligence data which bears the highest security classification and security protection, it will be necessary to give the space a thorough security "sweep" both physically and electronically.

2/25 - Hold to see if anything further happens
3/4 Nothing new
3/11 Nothing new. No further action necessary

Mr. Doherty stated that he is able to obtain the services of other members of the Committee (Defense Intelligence Agency, National Security Agency, and Central Intelligence Agency) to handle this security check but he did not want to do so without first touching base with the FBI since we occupy space in the same building and accordingly may want to handle the job ourselves.

Mr. Doherty was advised that the security check would not interfere with our own operations in the building and he should certainly feel free to contact one of the other agencies to make the check especially since he has knowledge of their availability to do so and in view of our own heavy workload.

For information.

Reference is made to the memorandum from M. A. Jones to Mr. Bishop dated 3/10/71, in which it is reported that Senator Robert C. Byrd, Senate Majority Whip, had inquired through Robert Dunphy, Senate Sergeant-at-Arms, whether the FBI would make a microphone security survey of the Senator's two personal offices in the Capitol and Senate Office Buildings. The Director approved.

Pursuant to arrangements made by [redacted] of the FBI Laboratory Special Agents Joseph B. Parsons and [redacted] made a microphone security survey of Senator Byrd's two offices on 3/17/71. Based on the decision of [redacted] one of two members of the Senator's staff who were aware of the survey request, the check was limited to those places where microphones would most likely be concealed, in order to minimize the possible necessity of damaging building surfaces. The work included the examination of 4 telephone instruments and 23 lines within the office space.

No evidence of any irregularities or eavesdropping devices was observed at the time of the survey. Neither the Senator nor any knowledgeable staff member was present at the completion of the survey so they could be advised of the results.

RECOMMENDATION:

That Senator Robert C. Byrd be advised orally of the results of the survey by Inspector Bowers.

By request, [redacted] called on Robert Dunphy, Sergeant-at-Arms of the Senate, on 3-10-71. Mr. Dunphy, with whom we have excellent relations, advised that Senator Byrd had asked Dunphy to make a check of the Senator's offices for any wiretaps and/or listening devices. Mr. Dunphy stated he has arrangements with the telephone company whereby checks can be made for wiretaps; however, he does not have any capability for checking offices for microphones and other such devices. He stated he had so informed Senator Byrd who then asked him if he would see if the FBI would make this check for him.

Senator Byrd recently defeated Senator Edward Kennedy (D-Mass.) for the position of Majority Whip of the Senate. We have enjoyed a very friendly relationship with Senator Byrd who has come to our defense on a number of occasions. Mr. Dunphy stated that the Senator is particularly concerned with his Whip office in view of the fact this space previously was occupied by Senator Kennedy and earlier by [redacted] hence, the possibility that some listening devices may have been planted in those days and are still in place.

We have in the past on a very select basis made such checks for friendly Senators and Congressmen and it is felt it would be appropriate to make this check for Senator Byrd.

RECOMMENDATION:

That the Director approve representatives of the Laboratory checking Senator Byrd's office space for listening devices. If approved, Bowers will make the necessary arrangements directly with Senator Byrd.

[] has suggested it might be a good idea if it is possible, and the Director would approve, to make a security survey outside the hearing room to determine whether or not it is possible for newsmen with their usual recording equipment to pick up the proceedings inside the hearing room.

Howe has suggested that if convenient, this might be done when Congress is in recess during the week of April 12, 1971, and if someone will contact him during that week at a date that it is convenient, he will work it out.

RECOMMENDATION:

That the Director approve this check being made outside of the hearing room.

All FBI telephone and teletype circuits from the telephone company central office come into the Justice Building by way of underground conduits and are terminated in the Justice Building telephone frame room on the second floor near the Great Hall. During previous periods of unrest, we insisted that [REDACTED] Department of Justice Communications Manager, strengthen security of the second floor frame room which is under control of the Justice Department proper. Additional security precautions were taken, at our insistence, by installing new locks on frame room doors, putting shatter-proof panels over the glass doors, and by installing alarms on these doors. Additionally, the pull boxes in the corridors of the entire building were checked to insure they could be locked and are kept locked.

[REDACTED] has advised these security precautions remain in effect. He also advised he had the telephone company spot-weld the man-hole covers accessing the underground conduits between the Justice Building and the telephone company central office. They have also been sealed with a plastic compound around all openings. This was done to preclude possibility of an automobile being stranded over a man-hole cover and by puncturing a gasoline tank, let gasoline drain into the man-hole which could then be set afire. [REDACTED] also advised GSA will provide portable emergency power to the main frame room switching equipment on the second floor. The Bureau has its own emergency power to serve our fifth floor telephone frame room, if needed.

Q

It appears all reasonable measures have been taken to assure our telephone service will not be totally disrupted

By letter to the Director dated August 10, 1971, Mr. Nathan D. Dick, (former Special Agent), Director of Security at the Department of Health, Education, and Welfare, requested that Bureau personnel conduct a microphone and telephone survey of the Secretary's office and those of the Under Secretary, John G. Veneman, and Counselor to the Department, [REDACTED]

On August 20, 1971, pursuant to arrangements made with Mr. Dick, FBI Laboratory personnel conducted a microphone and telephone survey in the office of Secretary Elliot L. Richardson, and those of Under Secretary John G. Veneman, and Counselor to the Department, [REDACTED]. No evidence of eavesdropping devices or tampering of the telephone service was observed at the time of the check. Attached is a suggested letter to Mr. Dick which advises of the results of this security survey.

RECOMMENDATION:

That the attached letter to Mr. Nathan D. Dick, reporting the results of the microphone and telephone survey on August 20, 1971, of the office of Secretary Elliot L. Richardson, Under Secretary John G. Veneman, and Counselor to the Department, [REDACTED] be approved.

Washington, D.C. 20535

Dear Mr. Hoover:

On behalf of the Secretary and myself I wish to express our appreciation for the fine services rendered by the Federal Bureau of Investigation in conducting a security survey of our offices and telephone lines.

Special Agents Wilbur G. Stevens, [redacted]
[redacted] in conducting this survey handled the operations promptly, smoothly, and efficiently.

Thank you for the cooperation of the Federal Bureau of Investigation in this and other matters of mutual interest.

Sincerely,

Under Secretary John G. Veneman

OPTIONAL FORM NO. 10
MAY 1962 EDITION
GSA FPMR (41 CFR) 101-11.6

UNITED STATES GOVERNMENT

Memorandum

TO : Director, FBI Attn. Movement Unit

DATE: September 20, 1971

FROM : SAC, Milwaukee (66-882)

SUBJECT: SECURITY OF TELEPHONE AND TELETYPE LINES
MILWAUKEE OFFICE*Security of Telephone Services*Re Bureau R/S 9-16-71 and Milwaukee R/S to Bureau
and Chicago 8-20-71.

In referenced R/S you advised that the Milwaukee Office is delinquent in reporting to the Bureau results of quarterly security checks of telephone and teletype lines. Our last check was made 1-14-71.

Since Milwaukee does not have a sound-trained Agent to handle this matter, Milwaukee relies upon the Chicago Office, primarily for this service. Occasionally, the Minneapolis Office has been called upon to perform this service.

Numerous contacts have been made by Milwaukee with Chicago and Minneapolis to arrange to have security checks made. Both offices have advised that qualified personnel have been tied up in the installation of burglar alarm systems in the resident agencies.

Chicago advised this date that check would be made 9-23-71.

UNITED STATES GOVERNMENT

Memorandum

TO : *me* Director, FBI ATTN.: Adm. Div. Movement Unit

DATE: September 30, 1971

FROM : SAC, Little Rock (66-718)

Security SURVEYS

SUBJECT: QUARTERLY
TELEPHONE AND TELETYPE
SECURITY CHECKS, LITTLE ROCK

Every place

On 9/17/71, SA [redacted] of the Jackson Office, made a security check of the telephone and teletype facilities of the Little Rock Office. At the same time he made a security check of the office, and it appears to be secure.
